Homicide and the Politics of Law Reform Jeremy Horder,2012-07-12 What makes murder murder How should we understand the difference between intentional and reckless killing Should offenders be punished differently according to the perceived severity of their crime and when should they be excused These questions are the topic of intense debate within legal circles and beyond in the UK the US and the rest of world Jeremy Horder's role as the Law Commissioner for England and Wales on criminal law has given him unique insight into these questions and the debates surrounding them Here he analyses the recent political and legal reform movements offering a political history of homicide law reform from the 19th century to the modern era Using homicide as a starting point Horder raises deeper questions of who is and should be responsible for making and changing the law What role should there be for expert bodies judges and politicians What role should there be for the general public These questions invoke strong emotional responses Horder argues that comprehensive research into and a degree of difference to public opinion on the scope of homicide is essential to the reform process It is essential principally as a means of conferring true legitimacy on homicide reform in a democracy Elite or expert opinion alone will never authentically secure such legitimacy Offering an insider's view into the processes of achieving law reform Horder expresses criticism of a system that excludes the vast majority of people from consultation on reform of the laws that govern them

Behavioral Law and Economics Cass R. Sunstein,2000-03-28 This exciting volume marks the birth of a new field one which attempts to study law with reference to an accurate understanding of human behavior It reports new findings in cognitive psychology which show that people are frequently both unselfish and over optimistic that people have limited willpower and limited self control and that people are boundedly rational in the sense that they have limited information processing powers and frequently rely on mental short cuts and rules of thumb Understanding this behavior has large scale implications for the analysis of law in areas including environmental protection taxation constitutional law voting behavior punitive damages for civil rights violations labor negotiations and corporate finance With a better knowledge of human behavior it is possible to predict the actual effects of law to see how law can promote society's goals and to reassess the questions of what law should be doing
