Empowering India Through Digital Literacy (Vol. 2) Dr. S. Kalaivani & Dr. K. Saileela, Strategies to Fight Online Health Misinformation André Pereira Neto, 2025-10-10 This book offers a brief introduction to the three main tools available to fight online health misinformation: health information quality assurance, digital literacy, and fact checking. These are the resources public institutions and civil society can use to deal with the current health infodemic. We are immersed in a huge flow of information that is multiplying rapidly worldwide in a short period of time on different topics. Health is one of the areas in which there is an increasing amount of information available and shared on digital media for a growing number of interested parties. If the information is reliable, up to date, scientifically sound and understandable, it can play a fundamental role in self-care practices in reducing service costs in disease prevention and in health promotion. On the other hand, if the information is incomprehensible, outdated, incomplete, or incorrect, it can interfere with well-being, induce harm to individuals and to the society, and in extreme situations, promote disease and facilitate death. Many health professionals and health services users and managers are unaware of the existing strategies to address this problem, so this book intends to help them. Strategies to Fight Online Health Misinformation, Health Information Quality Assurance, Digital Literacy, and Fact Checking will serve as a quick guide for health professionals and health services users and managers to the tools available to combat online health misinformation and how they work. Institutions must provide health information quality assurance with reliable sources and scientifically updated information written in simple language. The development of educational practices focused on the critical and creative use of information and communication technologies promotes digital literacy. And journalists and public and private communications companies have developed fact-checking strategies to verify whether the information disclosed was obtained through reliable sources and assess whether it is true or false. This paper described the journey the authors took as teacher educators to improve their practice in digital literacy. The focus of the journey was to document the how to of the development and integration of digital literacy into courses and the method was collaborative self study. The sources of data were ongoing technology training i.e. training, wiki and recordings, integration of digital literacy into courses i.e. applications of readings and training and collaborations and co-reflections on the entire process i.e. phone conversations, video conferencing and email. Craig's 2009 five exemplars addressed trustworthiness. Literature synthesis and training experiences described how the authors developed their knowledge and skills while a detailed example of digital literacy integration and their co-reflections explicated both successes and new directions for innovation in practice. Specifically the literature review informed the decision making processes for digital literacy integration. Digital literacy training addressed the needed functional skills each author had identified for himself or herself as well as reaffirming the need for ongoing professional development. The authors reaffirmed the notion that mutual rapport, trust and accountability created a learning zone where they were able to construct a deeper understanding of their practice than individual self-reflection would have done. Finally by describing one area of digital literacy integration the authors contributed to the literature on the process of digital literacy.
