Second Language Learning Data Analysis Susan M. Gass,Antonella Sorace,Larry Selinker,2013-05-13 The purpose of this workbook is to provide students with practice in analyzing second language data For the student of second language learning hands on experience with actual data is essential in understanding the processes involved in learning a second language Working through exemplars of the kinds of interlanguages that learners do and do not create brings about a clearer understanding of the principles underlying these interlanguages as well as the universal principles of language learning those that are independent of particular languages and interlanguages The goal in this workbook is to present data organized in such a way that by working through pedagogically presented data sets students are led to a discovery and understanding of theoretical and or methodological issues In addition they acquire the ability to interpret data and to begin to draw conclusions from them The authors intend that students should go from the data to a conclusion that includes a 3 part statement what else you should want to know about these data why this specifically and not something else and how one can empirically research what you want to find out This sequence of questions forces students to constantly keep in mind the important question of falsification What kind of data would it take to falsify the particular conclusions the students come to As with the earlier edition of this workbook Sorace Gass a three part set workbook manual tapes is also available

Language teaching and language learning - Methods in a course book for German learners of English Jens Goldschmidt,2012-09-24 Seminar paper from the year 2008 in the subject English Language and Literature Studies Other grade 2 7 University of Siegen course Teaching English Methods And Approaches language English abstract In my term paper I will try to investigate a unit of an English course book for German learners of English as their second language For this aim I will use the English G2000 B1 for the fifth grade Realschule I decided for the Realschule version as I m studying on teaching profession for this type of school Considering the extent of this paper I will not be able to investigate this course book completely Instead of this I will concentrate on a small unit topic 4 in the end of unit four which deals with money and shopping In G2000 every unit closes with such a short topic unit and it has just like the larger units a focus on a language skill In case of topic 4 it is speaking In order not to write too much I will put emphasize on the methodological and theoretical background of the exercises and tasks of this unit Which methods are used What about the role of the learner teacher Which competences are demanded and supported Is it sufficient to teach English only with the help of a course book Therefore I will give a short glimpse on the historical background of language teaching and learning at first so that the reader deserves basic information about methods and their theoretical background For a better entrance to my topic I will also involve the teacher s manual It includes information about new vocabulary materials and methods Furthermore it offers the teacher instructions for the exercises in the student s course book Therefore it is in a way essential because it is in fact a manual for the student s book Topic 4 consists of four main exercises Some of them are slightly complemented by parallel tasks from the pupil s workbook which is also available as additional support to the course book Furthermore there is a Vocabulary Action Sheet in the end of the teacher s manual including some vocabulary exercises for each unit
