Duncan Mills,Peter Koletzke,    *Oracle Enterprise Manager 10g Grid Control Handbook* Werner De Gruyter,Matthew Hart,Daniel Nguyen,2010-05-06 Master Oracle Enterprise Manager 10g Grid Control Centralize and simplify enterprise infrastructure administration using the detailed information contained in this Oracle Press guide Oracle Enterprise Manager 10g Control Handbook shows you how to implement a grid based management system and maintain on demand access to

critical services Develop rollout plans configure hardware and software deploy targets and agents control access and distribute business reports This authoritative resource also explains how to generate reliable backups implement top down performance monitoring and maximize system availability Plan and carry out an Oracle Enterprise Manager 10g Grid Control rollout Set up customized metrics alerts thresholds targets and agents Manage IT resources from a centralized control console or the command line Manage your infrastructure using secure protocols Automate administrative tasks with Oracle s management agent Distribute business intelligence using the reporting and dashboard features Work with Oracle Enterprise Manager Database Control and Oracle Real Application Clusters Build physical and logical standby databases using Oracle Data Guard   **Oracle Database 10g DBA Handbook** Kevin Loney,Bob Bryla,2005-04-14 Everything a DBA needs to know in one volume this is the must have reference for anyone working with the Oracle database and it s been fully revised and updated for Oracle Database 10g Co author Kevin Loney is the all time best selling Oracle Press author   **Pro JSF and Ajax** Jonas Jacobi,John R. Fallows,2006-11-22 Pro JSF and Ajax shows you how to leverage the full potential of JavaServer Faces JSF and Ajax This is not an entry level tutorial but a book about building Ajax enabled JSF components for sophisticated enterprise level rich Internet applications Written by JSF experts and verified by established community figures including Adam Winer member of the JSF Expert Group Java Champion Kito D Mann JSFCentral com and JSF in Action and Matthias Weendorf MyFaces this JSF 5 compatible book provides reliable and groundbreaking JSF components to help you exploit the power of JSF in your Java web applications This book provides a blueprint for building custom JSF user interface components and shows how to leverage the best browser technologies such as Ajax Mozilla XUL and Microsoft HTC to deliver rich Internet applications This book covers standard best practices for behavioral and renderer specific component classes renderers events and event listeners and JSP tag handlers for each It also covers advanced techniques such as dynamic content type negotiation JAR based resource delivery and dynamic render kit selection Foreword Does the world really and truly need another JavaServer Faces book I was fairly well convinced the answer could only be a resounding no After all there s a good half dozen books out in stores today by a whole host of web luminaries and I ve even personally helped as a technical reviewer on half of those So what more could really be said on the subject But when I thought about this a bit more it became clear that all of these books only go so far They ll show you how to use what JSF gives you out of the box throw you a bone for writing your own components and renderers maybe even a bit more But none that I ve seen get to the heart of why JSF is really and truly cool and important technology they make JSF look like YAMVCF Yet Another Model View Controller Framework for HTML more powerful here and there easier to use in many places a bit harder to use in others but really nothing major And certainly nothing that takes us beyond the dull basics of building ordinary looking web applications This book goes a lot further It ll cover the basics of course and show you how to build components but then it keeps going on to AJAX on to HTC on to XUL and how you can wrap this alphabet soup up underneath the heart of JSF its

component model and how you can leverage it to finally develop web applications that don't need radical re-architecting every time the winds of client technologies blow in a different direction. Along the way you'll learn a wide array of open source toolkits that make web magic practical even when you're not a Javascript guru. So heck I'm convinced. The world does need another JSF book.
