## **Order Without Design Information Production And Policy Making:**

**Order Without Design** Martha S. Feldman,2022 In this lively and ultimately disturbing study of policy analysts who are employed in bureaucracies the author finds a startling paradox The analysts know that the papers they so painstakingly prepare will not be used as one analyst remarked Either it won't get done in time or it won't be good enough or the person who wanted it done will have left and no one will know what to do with it or the issue will no longer exist Yet the analysts continue to work at producing these papers The means of producing information is at the heart of the paradox The process systematically produces information that is difficult to use directly in decision making Yet analysts can do little to alter the constraints of the process They continue to produce papers because it is their job they value doing it and it is their major means of influencing policy In so doing they make a unique though indirect contribution to policy making Drawing on eighteen months of observation and participation in the work of the policy office of the U S Department of Energy the author fully investigates the conditions that create the paradox and the positive as well as the negative implications of the process of information production in organizations

**Building the Compensatory State** Robert F. Durant, 2019-09-24 Contemporary public administration research has marginalized the importance of taking history seriously With few exceptions little recent scholarship in the field has looked longitudinally rather than cross sectionally contextually and theoretically over extended time periods at big questions in public administration One such big question involves the evolution of American administrative reform and its link since the nation's founding to American state building This book addresses this gap by analyzing administrative reform in unprecedented empirical and theoretical ways In taking a multidisciplinary approach it incorporates recent developments in cognate research fields in the humanities and social sciences that have been mostly ignored in public administration It thus challenges existing notions of the nature scope and power of the American state and with these important aspects of today's conventional wisdom in public administration Author Robert F. Durant explores the administrative state in a new light as part of a compensatory state driven shaped and amplified since the nation's founding by a corporate social science nexus of interests Arguing that this nexus of interests has contributed to citizen estrangement in the United States he offers a broad empirical and theoretical understanding of the political economy of administrative reform its role in state building and its often paradoxical results Offering a reconsideration of conventional wisdom in public administration this book is required reading for all students scholars or practitioners of public administration public policy and politics **Public Sector Innovation in Southern Africa** Costa Hofisi, Lewis Edwin Chigova, 2025-09-11 This timely and thought provoking book argues that public sector innovation ameliorates many societal challenges in Southern Africa demonstrating how innovative practices are already improving service delivery and addressing governance gaps Bringing together a diverse range of
