*Objective Becoming* Bradford Skow, 2015 Bradford Skow presents an original defense of the block universe theory of time often said to be a theory according to which time does not pass. Along the way he provides in-depth discussions of alternative theories of time including those in which there is robust passage of time or objective becoming. Presentism, the moving spotlight theory of time, the growing block theory of time and the branching time theory of time. Skow explains why the moving spotlight theory is the best of these arguments and rebuts several popular arguments against the thesis that time passes. He surveys the problems that the special theory of relativity has been thought to raise for objective becoming and suggests ways in which fans of objective becoming may reconcile their view with relativistic physics. The last third of the book aims to clarify and evaluate the argument that we should believe that time passes because somehow the passage of time is given to us in experience. He isolates three separate arguments this idea suggests and explains why they fail.

*Proofs from THE BOOK* Martin Aigner, Günter M. Ziegler, 2013-03-14 From the Reviews Inside PFTB. Proofs from The Book is indeed a glimpse of mathematical heaven where clever insights and beautiful ideas combine in astonishing and glorious ways. There is vast wealth within its pages, one gem after another. Some of the proofs are classics but many are new and brilliant proofs of classical results. Aigner and Ziegler write all we offer is the examples that we have selected, hoping that our readers will share our enthusiasm about brilliant ideas, clever insights and wonderful observations. I do. Notices of the AMS August 1999: the style is clear and entertaining, the level is close to elementary, and the proofs are brilliant. Three proofs of Euler's most famous infinite series appear in a separate chapter. There is also a number of other improvements such as an exciting new way to enumerate the rationals.
