Organicism As Reenchantment:

Understanding John Barth Stanley Fogel, Gordon Slethaug, 1990 The main aim of this work is to provide a comprehensive guide to the major writings of John Barth the author of *The Floating Opera* *The End of the Road* *Chimera* *The Tidewater Tales* *A Novel* and other works With roots in the 20 century existential tradition Barth sees human beings stripped of their beliefs in universal values and systems of belief in God tradition reason or literary formulations He is concerned about the kinds of choices that fulfill human and artistic potential and those that lead to failure and he is equally concerned about how those choices affect the environment Art to him shapes an awareness not only of literature itself but of self culture and history so he tries to review these areas against the grain

The Reenchantment of Science David Ray Griffin, 1988-05-06 This book describes the move from modern mechanistic science to a post modern organismic science David Ray Griffin gives voice to a revisionary postmodernism based on the work of Whitehead and Hartshorne that contrasts with the relativistic nihilistic postmodernism of Heidegger Derrida and Wittgenstein The book brings together some of today s most creative thinking about science Griffin s introductory essay summarizes the way in which the mechanistic view led to the disenchantment of science and the various reasons for the reversal of this process in our time The essays on physics cosmology biology ecology psychosomatic medicine and parapsychology bring out the various dimensions of the reenchantment of science the replacement of modern dualism and reductionism with an ecological organismic paradigm the priority of internal relations to external the causal power of experience the presence of experience purpose and intrinsic value throughout nature influence at a distance the laws of nature as habits the presence of a divine whole in all the parts and the history of the universe as a self creative meaningful story This book gives a powerful voice to this emerging movement s proposals for a postmodern science spirituality and world order

The Problem of Disenchantment Egil Asprem, 2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people s everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should

contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprey casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge The Problem of Disenchantment is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio

Neobaroque in the Americas Monika Kaup, 2012-11-07 In a comparative and interdisciplinary analysis of modern and postmodern literature film art and visual culture Monika Kaup examines the twentieth century's recovery of the baroque within a hemispheric framework embracing North America Latin America and U S Latino a culture As neobaroque comes to the forefront of New World studies attention to transcultural dynamics is overturning the traditional scholarship that confined the baroque to a specific period class and ideology in the seventeenth century Reflecting on the rich nonlinear genealogy of baroque expression Neobaroque in the Americas envisions the baroque as an anti proprietary expression that brings together seemingly disparate writers and artists and contributes to the new studies in global modernity **Landfall**
