## **Organisms And Artifacts Design In Nature And Elsewhere:**

**Organisms and Artifacts** Tim Lewens,2004 An investigation of the analogy between evolutionaryprocesses and the processes of intelligent design used in thelanguage of modern biology    **Functions in Biological and Artificial Worlds** Ulrich Krohs,Peter Kroes,2009 Investigations into the relationship between organism and artifacts from the perspective of functionality    *Functions: From Organisms to Artefacts* Jean Gayon,Armand de Ricqlès,Antoine C. Dussault,2023-07-25 This book originally published in French examines the philosophical debates on functions over the last forty years and proposes new ways of analysis Pervasive throughout the life sciences the concept of function has the air of an epistemological scandal ascribing a function to a biological structure or process amounts to suggesting that it is explained by its effects This book confronts the debates on function with the use of the notion in a wide range of disciplines such as biology psychology and medicine It also raises the question of whether this notion which is as old in the history of technology as it is in the life sciences has the same meaning in these two domains    **Life, Organisms, and Human Nature** Luca Corti,Johannes-Georg Schülein,2023-11-09 This collection of essays investigates the notions of life living organisms and human nature in Classical German Philosophy from a historical and conceptual perspective Its 19 chapters move from the peculiarities of organic life to the peculiarities of the distinctly human life form and discuss the strengths and weaknesses of naturalistic accounts of life In light of the growing interest in nature within current philosophical debates the book provides an overview of what the philosophical epoch of Kant Fichte Schelling Humboldt the Romantics Hegel and others can contribute to our understanding of life today The collection of essays represents a plurality of approaches that reflects the pluralism of the tradition itself highlighting the liveliness and polyphonic nature of the issues at stake and the ways in which they were approached in post Kantian thought In combining historical and philosophical investigation the collection constitutes a unique resource for scholars and graduate students working in various areas related to the study of nature in philosophy contemporary theories of science and the humanities more generally    *Organisms, Agency, and Evolution* D. M. Walsh,2015-11-13 This book argues that evolution arises from the activities of organisms as agents not from the replication of genes    **Nietzsche's Naturalism** Christian Emden,2014-05-29 This book examines Nietzsche s philosophical naturalism both historically and philosophically establishing a link between his discussions of nature and normativity    **Signs in the Dust** Nathan Lyons,2019-02-28 Modern thought is characterized by a dichotomy of meaningful culture and unmeaning nature Signs in the Dust uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poinsot John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in the Trinity which can be understood as an absolute cultural nature Signs in the Dust then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its

medieval sources along with Félix Ravaisson's philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that a cultural dimension is present through the whole order of nature and the whole of natural history. It also retrieves Aquinas' doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms. The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us. Against the modern divorce of nature and culture, Signs in the Dust argues that culture is natural and nature is cultural through and through.

**History and Philosophy of the Life Sciences**, 2006 **The Native Mind and the Cultural Construction of Nature** Scott Atran, Douglas L. Medin, 2008 An analysis of the cognitive consequences of diminished contact with nature examines the relationship between how people think about the natural world and how they act on it and how these are affected by cultural differences.

**The Dome of Eden** Stephen H. Webb, 2010-01-01 What would biology look like if it took the problem of natural evil seriously? This book argues that biological descriptions of evolution are inherently moral just as the biblical story of creation has biological implications. A complete account of evolution will therefore require theological input. The Dome of Eden does not try to harmonize evolution and creation. Harmonizers typically begin with Darwinism and then try to add just enough religion to make evolution more palatable or they begin with Genesis and pry open the creation account just wide enough to let in a little bit of evolution. By contrast, Stephen Webb provides a theory of how evolution and theology fit together and he argues that this kind of theory is required by the internal demands of both theology and biology. The Dome of Eden also develops a theological account of evolution that is distinct from the intelligent design movement. Webb shows how intelligent design properly discerns the inescapable dimension of purpose in nature but like Darwinism itself fails to make sense of the problem of natural evil. Finally this book draws on the work of Karl Barth to advance a new reading of the Genesis narrative and the theology of Duns Scotus to provide the necessary metaphysical foundation for evolutionary thought.

**Evolutionary Psychology as Maladapted Psychology** Robert C. Richardson, 2007 Takes a critical look at evolutionary psychology by subjecting its ambitious and controversial claims to the same sorts of methodological and evidential constraints that are broadly accepted within evolutionary biology.

**Humanity's End** Nicholas Agar, 2010 Nicholas Agar has written an excellent introduction to the moral challenges of our transition to a posthuman future engagingly told by contrasting the work of four very different transhumanists. Humanity's End joins Agar's Liberal Eugenics on the must read list for those interested in the future of the human race. James J. Hughes, Executive Director, Institute for Ethics and Emerging Technologies.

Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 2004 *Mind*, 2004 Issues for 1896-1900 contain papers of the Aristotelian Society **Organisms and Artefacts** Timothy Mark Lewens, 2001 *Choice*, 2004 **The British National Bibliography** Arthur James Wells, 2005 *Die Analogie von Vernunft und Natur* Angela Breitenbach, 2009 Main description Angesichts der zunehmenden Zerstörung der Natur durch den Menschen und der technischen Fortschritte in den Biowissenschaften ist die Frage nach dem Verhältnis des Menschen zu seiner natürlichen Umwelt von höchster Aktualität. Ausgehend von der Philosophie Kants nach der die Betrachtung der Natur wesentlich in einer Analogie mit der Vernunft des Menschen gründet entwickelt Angela Breitenbach einen Ansatz zu einer modernen Umweltphilosophie die einen wichtigen Beitrag zu aktuellen Debatten in der Umweltethik und der Philosophie der Biologie liefert.
