The image displays three separate digital literacy worksheets, each with a yellow border and a yellow title bar. The first worksheet, titled 'Computers Around Us', features a question mark icon and text about how computers are used in various places. The second worksheet, titled 'Understanding Data', includes a yellow icon with data symbols and a circular diagram of various devices. The third worksheet, titled 'Working Networks', shows a network of computer icons and text about how computers work together.

**Computers Around Us**

In this digital literacy worksheet, students learn about the various ways computers are used in our everyday lives. These essential tools are used in homes, schools, and workplaces. Look for pictures of different electronic devices around you. Use this page to make a list.

**Understanding Data**

Computers use data to work. Data is a collection of facts, such as numbers, words, or symbols. Data can be used to make decisions. For example, when you go to a movie theater, the ticket price depends on the day of the week. This is because there is more data on weekends than on weekdays. Data is also used to make decisions in business. For example, a company might decide to open a new store in a certain location based on the amount of data available about that area.

**Working Networks**

Computers work together to form a network. A network is a group of computers that are connected to each other. This allows them to share data and resources. For example, when you use a computer to download a file from the internet, your computer is connected to a network of computers that are all working together to share that file. This is why it is important to have a good network connection to download files quickly and easily.

*and Why to Read and Create Children's Digital Books* Natalia Kucirkova, 2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties digital literacies language and communication skills. Part II explores digital books created by children their caregivers teachers and librarians and Kucirkova also offers insights into how smart toys tangibles and augmented virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers as well as designers librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for How and Why to Read and Create Children's Digital Books. This is an exciting and innovative book not least because it is freely available to read online but because its origins are in primary practice. The author is an accomplished storyteller and whether you know as yet little about the value of digital literacy in the storymaking process or you are an accomplished digital player this book is full of evidence informed ideas explanations and inspiration. Liz Chamberlain Open University At a time when children's reading is increasingly on screen many teachers parents and carers are seeking practical straightforward guidance on how to support children's engagement with digital books. This volume written by the leading expert on personalised e-books is packed with app reviews suggestions and insights from recent international research all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice.
