## **New York Construction Law:**

**New York Construction Law** Michael K. De Chiara, Michael S. Zetlin, 2003-01-01 New York Construction Law covers everything from licensing and contracts to disputes and claims including full chapters on design build projects and recent trends in ADR. It examines all the pertinent cases and statutes with expert analysis by the state's top construction attorneys along with practical insights, warnings and advice culled from years of experience. Highlights include extensive discussion of the newly enacted Terrorism Risk Insurance Act of 2002, burden of proof under the Eicheleay formula, pending legislation in New York that would permit a new form of business entity that would be known as design professional service corporation, efforts by Governor Pataki to repeal the Wick's Law pending state legislation that would render design build contracts void unless the licensed engineer or architect is specifically identified in the contract and such licensee's practice is independent of the contracting party's business pending state legislation that would increase the threshold for public works contracts, latest cases concerning who may file a lien, what items are alienable when liens can be filed, liens filed against condominiums, lien foreclosure actions, a new section regarding assignee of construction contracts.
