The Rise of a New Media Baron and the Emerging Threat of News Deserts Penelope Muse Abernathy,2016 This report divided into four sections documents dramatic changes over the past decade With the industry in distress local newspapes are shrinking and some are vanishing At the same time a new type of newspaper owner has emerged very different from traditional publishers the best of whom sought to balance business interests with civic responsibilty to the community where their paper was located As newspapers confront an uncertain future the choices these new owners make could determine whether vast news deserts arise in communities and regions throughout the country This has implications not just for the communities where these papers are located but also in the long term for all of America page 5

Sound Business Michael Stamm,2011-05-03 American newspapers have faced competition from new media for over ninety years Today digital media challenge the printed word In the 1920s broadcast radio was the threatening upstart At the time newspaper publishers of all sizes turned threat into opportunity by establishing their own stations Many such as the Chicago Tribune s WGN are still in operation By 1940 newspapers owned 30 percent of America s radio stations This new type of enterprise the multimedia corporation troubled those who feared its power to control the flow of news and information In **Sound Business** historian Michael Stamm traces how these corporations and their

critics reshaped the ways Americans received the news Stamm is attuned to a neglected aspect of U S media history the role newspaper owners played in communications from the dawn of radio to the rise of television Drawing on a wide array of primary sources he recounts the controversies surrounding joint newspaper and radio operations These companies capitalized on synergies between print and broadcast production As their advertising revenue grew so did concern over their concentrated influence Federal policymakers especially during the New Deal responded to widespread concerns about the consequences of media consolidation by seeking to limit and even ban cross ownership The debates between corporations policymakers and critics over how to regulate these new kinds of media businesses ultimately structured the channels of information distribution in the United States and determined who would control the institutions undergirding American society and politics Sound Business is a timely examination of the connections between media ownership content and distribution one that both expands our understanding of mid twentieth century America and offers lessons for the digital age

The Press and America Michael C. Emery, Edwin Emery, Nancy L. Roberts, 1996 Textbook on mass media *Governing with the News* Timothy E. Cook, 1998-02-17 From the opening decades of the republic when political parties sponsored newspapers to current governmental practices that actively subsidize the collection and dissemination of the news the press and the government have been far from independent Unlike those earlier days however the news is no longer produced by a diverse range of individual outlets but is instead the result of a collective institution that exercises collective power In explaining how the news media of today operate as an intermediary political institution akin to the party system and interest group system Cook demonstrates how the differing media strategies used by governmental agencies and branches respond to the constitutional and structural weaknesses inherent in a separation of powers system Cook examines the news media s capacity to perform the political tasks that they have inherited and points the way to a debate on policy solutions in order to hold the news media accountable without treading upon the freedom of the press [The Future of Newspapers](#) Bob Franklin, 2013-09-13 The future of newspapers is hotly contested Pessimistic pundits predict their imminent demise while others envisage a new era of participatory journalism online with yet others advocating increased investment in quality journalism rather than free gifts and DVDs as the necessary cure for the current parlous state of newspapers Globally newspapers confront highly variable prospects reflecting their location in different market sectors countries and journalism cultures But despite this diversity they face similar challenges in responding to the increased competition from expansive radio and 24 hour television news channels the emergence of free Metro papers the delivery of news services on billboards pod casts and mobile telephony the development of online editions as well as the burgeoning of blogs citizen journalists and User Generated Content Newspapers revenue streams are also under attack as advertising increasingly migrates online This authoritative collection of research based essays by distinguished scholars and journalists from around the globe brings together a judicious mix of academic expertise and professional journalistic experience to analyse and report on the future of

newspapers This book was published as special issues of Journalism Practice and Journalism Studies Local Journalism and Local Media Bob Franklin,2005-08-18 The local media local newspapers and radio regional television cable television and local news on the internet represents a diverse and rapidly changing sector of the British media landscape Bringing together media academics local journalists and other media professionals this text presents a thorough up to date and authoritative account of recent developments and future prospects for Britain s local newspapers local media and local journalism Drawing on current research and relevant literature the book covers key developments in the local media scene the distinctive editorial format of local newspapers news sources and other sources available to local journalists recent developments in media policy online journalism ethics and regulations the impact of new technology Situating the study within the context of local national and multi national media networks this unique text provides students with a well written and wide ranging assessment of all aspects of the local media in the UK and as such will be a welcome addition to the current literature

The Times-Picayune in a Changing Media World S. L. Alexander, Frank D. Durham, Alfred Lawrence Lorenz, Vicki Mayer, 2014-07-17 In 2012 2013 one of the largest U S newspaper chains Advance Publications determined its main product was no longer newspapers but news and switched from daily print publication of The Times Picayune of New Orleans to three days a week while upgrading its presence online Digital First More than two hundred employees including half the newsroom were laid off in one of the poorest U S cities with among the lowest literacy rates and percentages of households with Internet access The decision raised a furor in New Orleans Beginning with an historical overview of The Times Picayune from its 1837 founding through the present The Times Picayune in a Changing Media World The Transformation of an American Newspaper describes the crucial role the dailies played in the 1960 school desegregation crisis as well as the impact of the switch on print coverage of hard news in the context of media developments and provides a detailed analysis of specific print editions of The Times Picayune and its digital formats conducted before and after the switch This study of the evolution of The Times Picayune is instructive for all concerned with what the transformation might portend for the news profession and for the traditional role of the press in the digital age

The Power of News Michael Schudson, 1995 Some say it s simply information mirroring the world Others believe it s propaganda promoting a partisan view But news Michael Schudson tells us is really both and neither it is a form of culture complete with its own literary and social conventions and powerful in ways far more subtle and complex than its many critics might suspect A penetrating look into this culture The Power of News offers a compelling view of the news media s emergence as a central institution of modern society a key repository of common knowledge and cultural authority One of our foremost writers on journalism and mass communication Schudson shows us the news evolving in concert with American democracy and industry subject to the social forces that shape the culture at large He excavates the origins of contemporary journalistic practices including the interview the summary lead the preoccupation with the presidency and the ironic and detached stance of the reporter toward the political world His book explodes certain myths perpetuated by both journalists and critics The press for instance did not bring about the Spanish American War or bring down Richard Nixon TV did not decide the Kennedy Nixon debates or turn the public against the Vietnam War Then what does the news do True to their calling the media mediate as Schudson demonstrates He analyzes how the news by making knowledge public actually changes the character of knowledge and allows people to act on that knowledge in new and significant ways He brings to bear a wealth of historical scholarship and a keen sense for the apt questions about the production meaning and reception of news today
