Niagara Escarpment:

National Parks and Protected Areas James Gordon Nelson, Rafal Serafin, 2013-06-29 National parks and protected areas offer a wealth of ecological and social contributions or services to humans and life on earth This book describes the strengths of national parks and protected areas in different parts of Europe and North America and the challenges to the full realization of their goals It shows that they are useful not only in conserving rare species and biodiversity but also in protecting water supply and other resources necessary to tourism and to economic and social development generally Ideas and information on useful planning management and decision making arrangements are presented and research needs are identified

The Niagara Escarpment William H. Gillard, Thomas R. Tooke, 1975-12-15 This book provides an informal history and tour of the Niagara Escarpment the backbone of Ontario and one of Canada's natural wonders Stretching from Tobermory at the tip of the Bruce Peninsula to Niagara Falls the escarpment exhibits a wide diversity of landscape people and industry in the present and in the past The authors have divided it into three major regions the rugged northern region which retains much of its primitive beauty serves primarily as a haven for tourists and summer residents although it was once a centre for fishing and lumbering Change has come also to the middle area Its waterpower once made it an industrial region but today the land from Meaford to Dundas is largely agricultural The south so rich in the early history of Canada is heavily settled and industrialized Over 80 photographs taken by William H Gillard who himself lives on the mountain capture the various facets of the region The rugged cliffs of the Bruce Peninsula contrast with the pastoral lands beneath Mount Nemo the neatly trimmed harbour at Tobermory counterpoints the Dundas swamp of Coote's Paradise We see the interplay of industry and agriculture from Owen Sound's grain elevators through Hamilton's blast furnaces to Jordan's vineyards and recreation and culture from tourist landmarks through Hockley Hills skiing to the museums of history and art The text provides entertaining glimpses of some of the people and some of the events in the history of settlement and growth proceeding from town to town north to south This readable book is the first to deal with the landscape and history of the entire Niagara Escarpment It is a useful guide to one of the most interesting and historic areas of Canada

The Last Stand Peter E. Kelly, Doug Larson, 2007-05-31 The most ancient and least disturbed forest ecosystem in eastern North America clings to the vertical cliffs of the Niagara Escarpment Prior to 1988 it had escaped detection even though the entire forest was in plain view and was being visited by thousands upon thousands of people every year The reason no one had discovered the forest was that the trees were relatively small and lived on the vertical cliffs of the Niagara Escarpment The Last Stand reveals the complete account of the discovery of this ancient forest of the miraculous properties of the trees forming this forest eastern white cedar and of what it was like for researchers to live work and study within this forest The unique story is told with text with stunning colour photographs and through vivid first hand accounts This book will stand the test of time as a testament to science imagination and discovery
