Diana Guzys, Eileen Petrie

Nice Ab 2006:

An Introduction to Community and Primary Health Care Diana Guzys, Eileen Petrie, 2013-10-30 Community nursing is the fastest growing area of nursing practice in Australia. This book offers an engaging introduction to the theory, skills and application of community and primary health care. Based on the Social Model of Health, *An Introduction to Community and Primary Health Care* explores how social and environmental factors impact healthcare in Australian communities. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment. The book is divided into three parts: theory, skills and health professionals in practice. This latter section is unique to this book and encourages students to consider how various nursing roles address issues of social justice, equality and access. Readable and highly practical, *An Introduction to Community and Primary Health Care* equips students with the theory, skills and understanding they will need as community and primary healthcare professionals working across Australia.

An Introduction to Community and Primary Health Care in Australia Diana Guzys, Eileen Petrie, 2013-10-30 Offers an engaging introduction to the theory, skills and application of community and primary health care. **Focus On: 100 Most Popular WWE Hall of Fame** Wikipedia contributors, **PACES for the MRCP** Tim Hall, 2013-09-17 The 3rd edition of *PACES for the MRCP* has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training, CMT and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features: Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment, history taking, examination and communication skills, equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, heart failure is not a diagnosis until a candidate has considered the differential diagnoses of breathlessness and decided why heart failure is most likely and then considered its cause, not always ischaemic heart disease. Its presentation, acute, chronic, left or right ventricular or both, and most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of *PACES for the MRCP* continues to provide fully revised up-to-date evidence-based coverage of investigations and treatments. Whilst the emphasis of *PACES* is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume. 250 cases organised into the 5 stations of the PACES exam: respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics, and skin, locomotion, eyes and endocrine systems. Engaging question and answer approach at the end of each case, excellent preparation for the exam. Boxed tips highlight vital information, helps identify what is most important to remember. Fully revised for the new Station 5 and
