Object Lessons with Origami Geneva Cobb Iijima, 1990-01-01 Object Lessons Caren Holtzman, Lynn Susholtz, 2024-11-15 When Caren Holtzman and Lynn Susholtz look around a classroom they see a veritable goldmine of mathematical investigations involving number measurement size shape symmetry ratio and proportion They also think of the ways great artists have employed these concepts in their depictions of objects and space for example Picasso s use of geometric shapes in his Cubist still lifes or contemporary artist Tara Donovan s room sized sculptures of everyday items In their new book *Object Lessons* Caren a math educator and Lynn an artist and art educator use a highly visual approach to show students and teachers the art in math and the math in art Integrating visual arts into math experiences makes the lessons accessible engaging and meaningful for a wide range of students In each chapter the authors use everyday objects to create rigorous hands on activities that address key mathematics standards and concepts Each lesson provides an introduction to the featured object that explains how it connects to key mathematical concepts a discussion of the artists art styles and techniques featured activities organized by grade level and math content area the basic materials required to prepare and teach each lesson a clear picture of what the lesson will look like in a classroom and a list of resources The book and its accompanying CD feature a wonderful gallery of images including art photos and student work and a collection of links to art education organizations museums and Web sites that focus on the work of forty major artists *Origami 5* Patsy Wang-Iverson, 2016-04-19 *Origami5* continues in the excellent tradition of its four previous incarnations documenting work presented at an extraordinary series of meetings that explored the connections between origami mathematics science technology education and other academic fields The fifth such meeting 5OSME July 13 17 2010 Singapore Management University fol **Object Lessons and Early Learning** Sharon Shaffer, 2018-07-11 The twenty first century is a time of change for early learning in museums due in part to society s evolving view of childhood from an age of innocence to understanding the robust learning that defines the first years of life This perspective is a catalyst for international conversation and continues to raise attention and interest across society *Object Lessons and Early Learning* leverages what is known about the cognitive development of young children to examine the power of learning through objects in museum and heritage settings Exploring the history and modern day practice of object based learning Shaffer outlines the rationale for endorsing this approach in both formal and informal learning spaces She argues that museums as collecting institutions are learning spaces uniquely positioned to allow children to make meaning about their world through personal connections to cultural artifacts natural specimens and works of art A range of descriptive object lessons inspired by objects in museums as well as from the everyday world are presented throughout the text as examples of ways in which children can be encouraged to engage with museum collections *Object Lessons and Early Learning* offers insights into strategies for engaging young children as learners in museum settings and in their everyday world and as such will be essential reading for museum

professionals classroom educators and students It should also be of great interest to academics and researchers engaged in the study of museums and education
