## **Object Of Labor Commodification In Socialist Hungary:**

*The Object of Labor* Martha Lampland, 1995-12 Did socialist policies leave the economies of Eastern Europe unprepared for current privatization efforts Under communist rule were rural villages truly left untouched by capitalism In this historical ethnography of rural Hungary Martha Lampland argues not only that the transition to capitalism was well under way by the 1930s but that socialist policies themselves played a crucial role in the development of capitalism by transforming conceptions of time money and labor Exploring the effects of social change thrust upon communities against their will Lampland examines the history of agrarian labor in Hungary from World War I to the early 1980s She shows that rural workers had long been subject to strict state policies similar to those imposed by collectivization Since the values of privatization and individualism associated with capitalism characterized rural Hungarian life both prior to and throughout the socialist period capitalist ideologies of work and morality survived unscathed in the private economic practices of rural society Lampland also shows how labor practices under socialism prepared the workforce for capitalism By drawing villagers into factories and collective farms for example the socialist state forced farmers to work within tightly controlled time limits and to calculate their efforts in monetary terms Indeed this control and commodification of rural labor under socialism was essential to the transformation to capitalism

Global Commodity Chains and Labor Relations, 2021-01-18 Due to the increasing linkage of global production sites the concept of commodity chains has become indispensable for the investigation of production at a global scale Although work is the basis of production in every involved location it is often being neglected as a research subject without taking interest in the workers the work processes and the working conditions This edited volume provides a collection of historical and contemporary commodity chain studies by placing labor at the centre of analysis A global historical perspective demonstrates that splitting production processes to different hierarchically connected locations are by no means new phenomena The book is thus an important and valuable contribution to commodity chain research but also to the fields of social economic and global labour history Contributors are Andr s Pinkasz Andrea Komlosy Christin Bernhold Ernst Langthaler Franziska Ollendorf Goran Musi Jan Grumiller Johanna Sittel J rg Nowak Karin Fischer Klemens Kaps Miroslav Lacko Santosh Hasnu Stefan Schmalz Tam s Ger cs Tibor T Meszmann and Uwe Spiekermann

Negotiating Territoriality Allan Charles Dawson, Laura Zanotti, Ismael Vaccaro, 2014-07-11 This edited collection disrupts dominant narratives about space states and borders bringing comparative ethnographic and geographic scholarship in conversation with one another to illuminate the varied ways in which space becomes socialized via political economic and cognitive appropriation Societies must first and foremost do more than wrangle over ownership and land rights they must dwell in space Yet historically the interactions between the state s territorial imperative with previous forms of landscape management have unfolded in a variety of ways including top down imposition resistance and negotiation between local and external actors These interactions have resulted in hybrid forms of territoriality and are often fraught with fundamentally

different perceptions of landscape This book foregrounds these experiences and draws attention to situations in which different social constructions of space and territory coincide collide or overlap Each ethnographic case in this volume presents forms of territoriality that are contingent upon contested histories politics landscape the presence or absence of local heterogeneity and the involvement of multiple external actors with differing motivations ultimately all resulting in the potential for conflict or collaboration and divergent implications for conceptions of community autochthony and identity

The Communist Experience in the Twentieth Century Glennys Young, 2011-10-13 Using a source based approach The Communist Experience in the Twentieth Century is the first text designed to help students general readers and scholars understand how people constructed Communist ways of life around the world Taking a global approach it extends beyond Russia and Eastern Europe to examine the lives of people in China Korea Vietnam Cambodia Kyrgyzstan Algeria Peru Cuba and elsewhere The book provides an inside look at the Communist experience where people were sometimes simultaneously so enthusiasts reshapers resisters and victims of an ideological project that was and for some still is both humanity's darkest nightmare and brightest hope Since the collapse of Communist regimes beginning in 1989 vital questions about how people subjectively experienced Communism helped to shape it and constructed an idea of self in such restrictive environments have not lost their political significance In fact just the opposite holds true The opening of many formerly closed Communist archives has given scholars the opportunity to research the political significance that the construction of the self had across Communist regimes politics and movements Incorporating the latest scholarship The Communist Experience in the Twentieth Century includes previously unavailable documents such as diaries and letters which are now accessible as a result of the archival revolution A photo essay Everyday Life and Everyday Things under Socialism 1945 1989 uses visual evidence to explore everyday life across the Communist civilizations A locator map at the beginning of each chapter identifies the places associated with each of the sources and a chronology provides a comparative timeline for Communist and world history

The Value of Labor Martha Lampland, 2016-09-15 At the heart of today's fierce political anger over income inequality is a feature of capitalism that Karl Marx famously obsessed over the commodification of labor Most of us think wage labor economics is at odds with socialist thinking but as Martha Lampland explains in this fascinating look at twentieth century Hungary there have been moments when such economics actually flourished under socialist regimes Exploring the region's transition from a capitalist to a socialist system and the economic science and practices that endured it she sheds new light on the two most polarized ideologies of modern history Lampland trains her eye on the scientific claims of modern economic modeling using Hungary's unique vantage point to show how theories policies and techniques for commodifying agrarian labor that were born in the capitalist era were adopted by the socialist regime as a scientifically designed wage system on cooperative farms Paying attention to the specific historical circumstances of Hungary she explores the ways economists and the abstract notions they traffic in can both shape and be shaped by local conditions and she compellingly shows how labor

can be commodified in the absence of a labor market The result is a unique account of economic thought that unveils hidden but necessary continuities running through the turbulent twentieth century      The Political Anatomy of Domination Béatrice Hibou, 2017-03-22 Rereading Marx Weber Gramsci and more recently Foucault Béatrice Hibou tackles one of the core questions of political and social theory state domination Combining comparative analyses of everyday life and economics she highlights the arrangements understandings and practices that make domination conceivable bearable even acceptable or reassuring To carry out this demonstration Hibou examines authoritarian situations especially comparing the paradigmatic European cases of fascism Nazism and Soviet socialism and those of contemporary China or North and Sub Saharan Africa

*Moving Workers* Claudia Bernardi, Viola Franziska Müller, Biljana Stojić, Vilhelm Vilhelmsson, 2023-10-04 This book explores how workers moved and were moved why they moved and how they were kept from moving Combining global labour history with mobility studies it investigates moving workers through the lens of coercion The contributions in this book are based on extensive archival research and span Europe and North America over the past 500 years They provide fresh historical perspectives on the various regimes of coercion mobility and immobility as constituent parts of the political economy of labour *Moving Workers* shows that all struggles relating to the mobility of workers or its restriction have the potential to reveal complex configurations of hierarchies dependencies and diverging conceptions of work and labour relations that continuously make and remake our world      **Education in/for Socialism** Tom G. Griffiths, Zsuzsa Millei, 2017-10-02 This book re-examines aspects of historical socialism and includes case studies of education within twenty first century socialist and post socialist contexts shaped by the trajectories of historical socialism Through these case studies contributions offer insights into key questions How are education systems and student subjectivities shaped by post socialist trajectories and current regional politics economics and resistance movements How do sedimented socialist discourses and geographies alter and contest the neoliberal child and childhood in post socialist education How have disjunctures between the rhetoric of historical Marxism Leninism and the practices of educators students and student political organizations played out under socialism and what could we learn from that for our present How much emancipatory potential is there in the theories and practices of popular education for combatting injustice in the absence of mass revolutionary political parties Above all this volume affirms the need to move beyond simplistic accounts of historical socialism and post socialist transitions By exploring how socialist trajectories remain influential and have potential in our current contexts this book contributes to the work of politically engaged educators working to re-imagine and reconstruct education This book was originally published as a special issue of *Globalisation Societies and Education*      *Urban Phantasmagorias* Iulia Stătică, 2023-11-30 *Urban Phantasmagorias* examines the legacies of socialist housing in the city of Bucharest during the period of communist rule in Romania The book explores the manner in which the socialist state reconfigured the city through concrete acts of demolition and construction as well as indirectly through legal frameworks aimed at the regulation of women's reproductive

agency in an attempt to materialize its idea of modernity. It follows the effects of this state agenda with a focus on the period between 1965 and 1989 through an investigation of the transformations, representations, meanings, and uses of domestic spaces. The book draws on Walter Benjamin's concept of phantasmagoria, which provides a critical framework through which it articulates the dynamic relationship between ideology, architecture, and everyday practices, and reassesses their impact upon individual subjectivity and agency. The woman emerges as a central subject of the book upon whom the phantasmagoric effects of the socialist state's modernizing agenda have an acute impact at the level of lived domesticity and everyday life. Through a focus on the lived experiences of women, the book illuminates the prismatic effect of the state's infrastructural and legal intentions, including the ways in which these were subverted through women's lived bodily experiences of the home. The book establishes both theoretically and through the concrete case of the city of Bucharest, the methodological significance of Benjamin's notion of phantasmagoria as an epistemological approach to a modern communist cityscape. *Urban*

*Phantasmagorias* is an important contribution to scholarship in architectural history and theory, urban and gender studies, and post-socialist and Eastern European studies. **Remains of Socialism** Maya Nadkarni, 2020-07-15. In *Remains of Socialism*, Maya Nadkarni investigates the changing fates of the socialist past in post-socialist Hungary. She introduces the concept of remains, both physical objects and cultural remainders, to analyze all that Hungarians sought to leave behind after the end of state socialism. Spanning more than two decades of post-socialist transformation, *Remains of Socialism* follows Hungary from the optimism of the early years of transition to its recent right-wing turn toward illiberal democracy. Nadkarni analyzes remains that range from exiled statues of Lenin to the socialist-era Bambi soda and from discredited official histories to the scandalous secrets of the communist regime's informers. She deftly demonstrates that these remains were far more than simply the leftovers of an unwanted past. Ultimately, the struggles to define remains of socialism and settle their fates would represent attempts to determine the future and to mourn futures that never materialized. *Work, Society, and the Ethical Self* Chris Hann, 2021-09-17. Primarily on the basis of ethnographic case studies from around the world, this volume links investigations of work to questions of personal and professional identity and social relations. In the era of digitalized neoliberalism, particular attention is paid to notions of freedom, both collective in social relations and individual in subjective experiences. These cannot be investigated separately. Rather than juxtapose economy with ethics or the profitable with the good, the authors uncover complex entanglements between the drudgery experienced by most people in the course of making a living and ideals of emancipated personhood. *Border Encounters* Jutta Lauth Bacas, William

Kavanagh, 2013-10-01. Among the tremendous changes affecting Europe in recent decades, those concerning political frontiers have been some of the most significant. International borders are being opened in some regions while being redefined or reinforced in others. The social relationships of those living in these borderland regions are also changing fundamentally. This volume investigates from a local ground-up perspective what is happening at some of these border encounters face to face.

interactions and relations of compliance and confrontation where people are bargaining exchanging goods and information and maneuvering beyond state boundaries Anthropological case studies from a number of European borderlands shed light on the questions of how and to what extent the border context influences the changing interactions and social relationships between people at a political frontier Persistence of Networks in the Post-communist Transformation in Eastern Europe Akos Rona-Tas,1998 **Current Contents.
