Kripke, 2011-11-10 This important new book is the first of a series of volumes collecting the essential articles by the eminent and highly influential philosopher Saul A. Kripke. It presents a mixture of published and unpublished articles from various stages of Kripke's storied career. Included here are seminal and much discussed pieces such as Identity and Necessity, Outline of a Theory of Truth, Speaker's Reference and Semantic Reference, and A Puzzle About Belief. More recent published articles include Russell's Notion of Scope and Frege's Theory of Sense and Reference among others. Several articles are published here for the first time including both older works Two Paradoxes of Knowledge, Vacuous Names and Fictional Entities, Nozick on Knowledge as well as newer The First Person and Unrestricted Exportation. A Puzzle on Time and Thought was written expressly for this volume. Publication of this volume which ranges over epistemology, linguistics, pragmatics, philosophy of language, history of analytic philosophy, theory of truth and metaphysics represents a major event in contemporary analytic philosophy. It will be of great interest to the many who are interested in the work of one of its greatest living figures. **The Journal of Philosophy**, 1984 Covers topics in philosophy, psychology and scientific methods. Vols 31 include A Bibliography of philosophy 1933 **Formal Languages and Intensional Semantics** Sten Carl Lindström, 1980 **Language, Structure, and Meaning** Swapna Sengupta, 1977 **Balkanistica**, 2000 **Essays in Linguistic Ontology** Jack Kaminsky, 1982 Metaphysical questions relating to what exists do not seem to fade away, notes Jack Kaminsky in this book which takes as its starting point the Quinian view that we determine what exists by means of the formal systems we construct to explain the world. This starting point Kaminsky points out is not novel: philosophers have often tried to construct formal systems and from these systems they have been able to deduce what can be said to exist. Contemporary formal systems are different from earlier ones, however, because they make more extensive use of the results of linguistics, logic and mathematics studies. But these contemporary formal systems also must state eventually what their commitments to existence are and they must be able to show their commitments to be free of paradox, ambiguity and contradiction. Given these conditions, Kaminsky examines the difficulties inherent in the existence claims of contemporary formal language systems. To do this he uses only a minimum of the technical elements of propositional and first order quantificational logic. He concludes many existential commitments are relative to the formal systems of time; some commitments seem to be absolute and some problems, those relating to vacuous terms, arise only

because no distinction is made between humanly constructed objects and naturally constructed objects **Logic and Logical Philosophy** ,1996 A Critical Analysis of Gottlob Frege's Philosophy of Language Howard Oliver Jackson,1967
