dependency needs and strong narcissistic features undifferentiated self object boundaries the research suggests that there is a link between obsessive love and attachment disruption in the past year of life these individuals have not successfully mastered tasks related to separation and individuation the literature suggests that the experience of obsessive love may be regarded as an internalized transitional object D Winnicott This author argues that the obsession is based upon morbid object relationships and as such cannot be considered transitional in a maturational sense but may with the help of psychoanalytic intervention serve a transitional function the author concludes that the obsession in obsessive love is dyadic rather than monadic by nature and that dynamics of projective identification M Klein T Ogden and extractive introjection C Bollas play a significant role in unconscious communication between partners Object relations treatment techniques are suggested
