**A Guide to the Formulation of Plans and Goals in Occupational Therapy** Sue Parkinson, Rob Brooks, 2020-11-29. This practical guide for occupational therapists introduces a tried and tested method for moving from assessment to intervention by formulating plans and measurable goals using the influential Model of Human Occupation (MOHO). Section 1 introduces the concept of formulation, where it comes from, what it involves, why it is important, and how assessment information can be guided by theoretical frameworks and organised into a flowing narrative. Section 2 provides specific instructions for constructing occupational formulations using the Model of Human Occupation. In addition, a radically new way for creating aspirational goals is introduced based on a simple acronym which will enable occupational therapists to measure sustained changes rather than single actions. Section 3 presents 20 example occupational formulations and goals from a wide range of mental health, physical health, and learning disability settings, as well as a prison service and services for homeless people and asylum seekers. Designed for practising occupational therapists and occupational students, this is an essential introduction for all those who are looking for an effective way to formulate plans and goals based on the Model of Human Occupation. **The PTA Handbook** Kathleen A. Curtis, Peggy DeCelle Newman, 2005. Are you tired of searching through multiple texts, articles, and other references to find the information you need? The PTA Handbook: Keys to Success in School and Career for the Physical Therapist Assistant contains extensive coverage of the most pertinent issues for the physical therapist assistant, including the physical therapist-physical therapist assistant preferred relationship, evidence-based practice, and problem-solving essentials of information competence and diversity. This comprehensive text successfully guides the student from admission into a physical therapist assistant program to entering clinical practice. The user-friendly format allows easy navigation through topics including changes and key features of the health care environment, guides to essential conduct and behavior, and ethical and legal considerations. Strategies are provided to successfully manage financial decisions and curriculum requirements, as well as opportunities and obstacles that may emerge. The physical therapist-physical therapist assistant relationship, often a source of confusion for health care and academic administrators, is specifically profiled and analyzed. The authors clarify this relationship by utilizing an appropriate mixture of case studies, multiple examples, and current reference documents.
