Jack P. Gibbs,2015-11-17 This fascinating book analyzes 13 control failures in human history from Robespierre s promotion of the French Revolution to Hoover s efforts to stop the Great Depression to the intelligence failures of 9 11 Assessing the causes of 10 additional historical cases the author s comparative analysis shows how each leadership failure was caused by an expansion of the range of control attempts their scope and or their diversity A leader s or other actor s attempts to broaden the range of control targets have been most important in causing great human failures The analysis is timely during an era when war global warming and other vexing problems plague our society      *Is Killing Wrong?* Mark Cooney,2009-10-07 Thou shalt not kill is arguably the most basic moral and legal principle in any society Yet while some killers are pilloried and punished others are absolved and acquitted and still others are lauded and lionized Why The traditional answer is that how killers are treated depends on the nature of their killing whether it was aggressive or defensive intentional or accidental But those factors cannot explain the enormous variation in legal officials and citizens responses to real life homicides Cooney argues that a radically new style of thought pure sociology can Conceived by the sociologist Donald Black pure sociology makes no reference to psychology to any single person s intent or even to individuals as such Instead pure sociology explains behavior in terms of its social geometry its location and direction in a multidimensional social space *Is Killing Wrong* provides the most comprehensive assessment of pure sociology yet attempted Drawing on data from well over one hundred societies including the modern day United States it represents the most thorough account yet of case level social control or the response to conduct defined as wrong In doing so it demonstrates that the law and morality of homicide are neither universal nor relative but geometrical as predicted by Black s theory
