Object Oriented Networks:

Object-oriented Networks Subodh Bapat,1994 Applies object oriented modeling techniques to the design of networks network interoperability operations and network management tools based on the Internet Management Protocol and the Simple Network Management Protocol Develops novel modeling concepts specialized to communication networks and includes many examples of object oriented technology applied to design of network software **Object-Oriented Neural Networks in C++** Joey Rogers,1997 This book is distinctive in that it implements nodes and links as base objects and then composes them into four different kinds of neural networks Roger s writing is clear The text and code are both quite readable Overall this book will be useful to anyone who wants to implement neural networks in C and to a lesser extent in other object oriented programming languages I recommend this book to anyone who wants to implement neural networks in C D L Chester Newark Delaware in COMPUTING REVIEWSObject Oriented Neural Networks in C is a valuable tool for anyone who wants to understand implement or utilize neural networks This book disk package provides the reader with a foundation from which any neural network architecture can beconstructed The author has employed object oriented design and object oriented programming concepts to develop a set of foundation neural network classes and shows how these classes can be used to implement a variety of neural network architectures with a great deal of ease and flexibility A wealth of neural network formulas with standardized notation object code implementations and examples are provided to demonstrate the object oriented approach to neural network architectures and to facilitatethe development of new neural network architectures This is the first book to take full advantage of the reusable nature of neural network classes Key Features Describes how to use the classes provided to implement a variety of neural network architectures including ADALINE Backpropagation Self Organizing and BAM Provides a set of reusable neural network classes created in C capable of implementing any neural network architecture Includes an IBM disk of the source code for the classes which is platform independent Includes an IBM disk with C programs described in the book **Visualisation and Simulation with Object-oriented Networks** Alexandru Christian Telea,2000 **Object-oriented Network Protocols** Stefan Boecking,2000 This book provides a foundation for the object oriented design and implementation of modular composable reusable and or extendable network communication protocols Programmers will then be able to implement protocols and services by composing rather than programming them from a set of already specified implemented and tested elementary protocol objects according to the application needs and the network environment The book is organised in three parts fundamentals of networks and applications reference framework for modular communication systems and case studies of system designs and implementations Network World ,1995-09-18 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video

systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce Distributed Object Oriented Network Architecture (DONA) Kigen Kandie,1997 Bayesian Networks for Probabilistic Inference and Decision Analysis in Forensic Science Franco Taroni,Alex Biedermann,Silvia Bozza,Paolo Garbolino,Colin Aitken,2014-09-22 Bayesian Networks This book should have a place on the bookshelf of every forensic scientist who cares about the science of evidence interpretation Dr Ian Evett Principal Forensic Services Ltd London UK Bayesian Networks for Probabilistic Inference and Decision Analysis in Forensic Science Second Edition Continuing developments in science and technology mean that the amounts of information forensic scientists are able to provide for criminal investigations is ever increasing The commensurate increase in complexity creates diffculties for scientists and lawyers with regard to evaluation and interpretation notably with respect to issues of inference and decision Probability theory implemented through graphical methods and specifically Bayesian networks provides powerful methods to deal with this complexity Extensions of these methods to elements of decision theory provide further support and assistance to the judicial system Bayesian Networks for Probabilistic Inference and Decision Analysis in Forensic Science provides a unique and comprehensive introduction to the use of Bayesian decision networks for the evaluation and interpretation of scientific findings in forensic science and for the support of decision makers in their scientific and legal tasks Includes self contained introductions to probability and decision theory Develops the characteristics of Bayesian networks object oriented Bayesian networks and their extension to decision models Features implementation of the methodology with reference to commercial and academically available software Presents standard networks and their extensions that can be easily implemented and that can assist in the reader s own analysis of real cases Provides a technique for structuring problems and organizing data based on methods and principles of scientific reasoning Contains a method for the construction of coherent and defensible arguments for the analysis and evaluation of scientific findings and for decisions based on them Is written in a lucid style suitable for forensic scientists and lawyers with minimal mathematical background Includes a foreword by Ian Evett The clear and accessible style of this second edition makes this book ideal for all forensic scientists applied statisticians and graduate students wishing to evaluate forensic findings from the perspective of probability and decision analysis It will also appeal to lawyers and other scientists and professionals interested in the evaluation and interpretation of forensic findings including decision making based on scientific information **Object Oriented Network Performance Analyzer** Sankaralingam Ramalingam,1994 **Integrated Network Management IV** A.S.
