**Observing Ourselves** Earl Babbie, 2015-01-29 Is it possible for human beings to study other humans as scientifically as physicists and microbiologists study inorganic matter cells and tissue According to Dr Babbie one of the most recognized names in applied sociology the social scientist must understand more than just the methodology involved in research Babbie's conviction that the power of social research lies more in the realm of questions than in the realm of answers prompted him to compose fifteen short essays addressing some of the fundamental philosophical and methodological issues involved in the scientific study of human beings

**Self-Observation in the Social Sciences** Joshua W. Clegg, 2018-04-17 Notwithstanding the mythical demise of introspection self observation has always been an integral aspect of the social sciences In the century following the behavioral revolution psychology has seen a reduction not so much in the frequency as in the rigor with which self observation is practiced A great deal of self observation has been renamed or obscured as for example self report but this has served only to defer and impoverish important theoretical and technical work This volume which contributes to the development of a rigorous theory of self observation is organized around three general objectives to re animate a discourse on self observation through a historical analysis of various self observation traditions to outline and begin to address some of the unique theoretical challenges of self observation and to elaborate some of the technical and practical details necessary for realizing a program of research dedicated to self observation In the first section of the book three historians of psychology trace the evolution of self observation In the second three scholars who are currently working in contemporary traditions of self observation discuss the basic theoretical and practical challenges involved in conducting self observation research In the final two sections of the book scholars from the phenomenological and narrative traditions trace the history theory and practice of self observation in their respective traditions *Self Observation in the Social Sciences* continues the fine tradition set by *Transaction's History and Theory of Psychology* series edited by Jaan Valsiner It is of interest to psychologists and to those who study methodology within the social sciences
