## **Obstacles To Peace:**

**Understanding Obstacles to Peace** Mwesiga Laurent Baregu, 2011 This book describes and analyzes protracted conflicts in the Great Lakes Region of Africa. In doing so, it emphasizes obstacles to peace rather than root causes of conflict. Case studies are presented from Burundi, the Democratic Republic of the Congo, Northern Kenya, Northern Uganda, Southern Sudan, and Zanzibar. Amongst other conclusions, the book shows that to settle or transform protracted conflicts, distinction must be made between strategic and nonstrategic actors; the former must be able to prevail upon the latter in the negotiation and implementation of peace agreements. The theme and collection of the research presented in this book is unique in the literature. The case studies all employ methods of thick description of process, tracing following particular actors and their interests, and in-depth personal interviews. The book will be of interest to academics, researchers, undergraduate and postgraduate students, and professionals in conflict theory, analysis, and resolution, African and development studies, political science, and international affairs, as well as to mediators, negotiators, and facilitators in conflict resolution.

*Obstacles to Peace* S. S. McClure, 1857-1949, 2025-05-22. *Obstacles to Peace* written by S. S. McClure and originally published in 1917, examines the complex factors hindering the achievement of lasting peace during the tumultuous period of World War I. McClure, a prominent journalist and magazine publisher, offers his analysis of the political, social, and economic forces at play, identifying the key impediments to negotiation and reconciliation. Drawing on his extensive network and insights, McClure provides a valuable perspective on the challenges faced by diplomats, politicians, and ordinary citizens striving for an end to the conflict. This book serves as a historical document reflecting the hopes, fears, and frustrations of a world at war and remains relevant for understanding the enduring obstacles to peace in the modern era. Conversation Oriana Skylar Mastro Consulting LLC, 2019-03-15 After a war breaks out what factors influence the warring parties decisions about whether to talk to their enemy and when may their position on wartime diplomacy change How do we get from only fighting to also talking In *The Costs of Conversation* Oriana Skylar Mastro argues that states are primarily concerned with the strategic costs of conversation and these costs need to be low before combatants are willing to engage in direct talks with their enemy Specifically Mastro writes leaders look to two factors when determining the probable strategic costs of demonstrating a willingness to talk the likelihood the enemy will interpret openness to diplomacy as a sign of weakness and how the enemy may change its strategy in response to such an interpretation Only if a state thinks it has demonstrated adequate strength and resiliency to avoid the inference of weakness and believes that its enemy has limited capacity to escalate or intensify the war will it be open to talking with the enemy Through four primary case studies North Vietnamese diplomatic decisions during the Vietnam War those of China in the Korean War and Sino Indian War and Indian diplomatic decision making in the latter conflict *The Costs of Conversation* demonstrates that the costly conversations thesis best explains the timing and nature of countries approach to wartime talks and therefore when peace talks begin As a result Mastro s findings have significant theoretical and practical implications for war duration and termination as well as for military strategy diplomacy and mediation

*Overcoming Obstacles to Peace* James Dobbins, Laurel E. Miller, 2013 This volume analyzes the impediments that local conditions pose to successful outcomes of nation building interventions in conflict affected areas Previous RAND studies of nation building focused on external interveners activities This volume shifts the focus to internal circumstances first identifying the conditions that gave rise to conflicts or threatened to perpetuate them and then determining how external and local actors were able to modify or work around them to promote enduring peace It examines in depth six varied societies Cambodia El Salvador Bosnia and Herzegovina East Timor Sierra Leone and the Democratic Republic of the Congo It then analyzes a larger set of 20 major post Cold War nation building interventions The authors assess the risk of renewed conflict at the onset of the interventions and subsequent progress along five dimensions security democratization government effectiveness economic growth and human development They find that transformation of many of the specific conditions that gave rise to or fueled conflict often is not feasible in the time frame of nation building operations but that such transformation has not proven essential to achieving the primary goal of nation building establishing peace Most interventions in the past 25 years have led to enduring peace as well as some degree of improvement in the other dimensions assessed The findings suggest the importance of setting realistic expectations neither expecting nation building operations to quickly lift countries out of poverty and create liberal democracies nor being swayed by a negative stereotype of nation building that does not recognize its signal achievements in the great majority of cases
