Ocean Our Future

William Herbert Brown

Ocean Our Future:

The Ocean: Our Future Independent World Commission on the Oceans, 1998-09-17 The Ocean Our Future is the official report of the Independent World Commission on the Oceans chaired by M. Rio Soares. This book is the first to deal holistically in a single volume with the full range of problems confronting our oceans on the eve of the twenty-first century. In the space of only a few decades, our traditional perception of the oceans as a source of wealth, opportunity, and abundance has changed. The oceans have become the setting for a growing list of problems: territorial disputes, disruptions to global climate, overfishing, species extinction, pollution, illegal trafficking, and the destruction of coastal communities. Based on the deliberations, experience, and input of some 100 specialists from around the world, the book advances innovative ideas for improving governance of the oceans and coastal zones. Written in an accessible manner, this book will be valued by everyone interested in the future of the oceans.

The Willing World James Bacchus, 2018-07-19 In this time of unwillingness, the right kinds of global solutions are needed now more than ever. Climate change is here and intensifying. Anxieties over economic globalization grip many in the fear of change. While these fears have turned inward into unwillingness, the world's willing are working harder than ever for international and other cooperative solutions. James Bacchus explains why most of the solutions we need must be found in local and regional partnerships of the willing that can be scaled up and linked up worldwide. This can only be achieved within new and enhanced enabling frameworks of global and other international rules that are upheld through the international rule of law. To succeed, these rules and frameworks must for the first time see and treat economy and environment as one. The Willing World explains how best we can build the right legal structure to attain our global goals and summon and inspire the willingness needed to do it.

The IMLI Treatise On Global Ocean Governance David Joseph Attard, David M. Ong, Dino Kritsiotis, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea (UNCLOS) remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance, including maritime transport, fisheries, and marine environmental sustainability, have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs), particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of an integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of the UN as the central intergovernmental organization responsible for global ocean governance. It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges. It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean.

governance system Fisheries Exploitation in the Indian Ocean Dennis Rumley, Sanjay Chaturvedi, Vijay Sakhuja, 2009 The book aims to further the debate on the impacts of fisheries policies in the Indian Ocean Region in order to facilitate a new regional policy direction A key argument of the volume is that ecologically sustainable and socially just development and management of Indian Ocean fisheries require a paradigm shift in the perceptions and policies of major stakeholders A central policy challenge is to identify a collective regional interest for fisheries and accordingly the development of integrated management policies that link ecology and society and which incorporate individuals communities agencies states and regimes into a holistic cooperative endeavour Successful ocean governance therefore requires greater inter state and inter agency consultation and cooperation an improvement in linking national initiatives to local action increased participation of local government and local communities and the enhancement of local capability In order to achieve this overall goal requires either the enhancement of existing regional institutions or the creation of a new regional body Institute of Southeast Asian Studies Singapore and Indian Ocean Research Group IORG co publication ISEAS has worldwide distribution rights Maritime Cooperation and Security in the Indo-Pacific Region ,2022-12-12 More than twenty Indo Pacific scholars and emerging experts come together in this definitive volume to deliver fresh perspectives and original research on maritime cooperation and security With subjects ranging from the Philippines to Antarctica Coast Guards to climate change these essays pay tribute to the late Commodore Sam Bateman PhD while laying the academic groundwork for the improved policies and behaviours that provide for expanded good order at sea The Politics of Maritime Power Andrew T. H. Tan, 2010-10-18 This reference book looks at the modern day use of maritime power for achieving a range of political objectives Routledge Handbook of the South China Sea Zou Keyuan, 2021-06-28 The Routledge Handbook of the South China Sea presents a comprehensive and in depth analysis of South China Sea issues It evaluates the dynamics of the latest developments and identifies factors that contribute to dispute settlement and a cooperative management regime of one of the most important seas in the world one which not only contains rich marine resources and distinctive biodiversity but is also a critical sea route for global trade and communications The Handbook is divided into six parts each representing a focused area of enquiry History and geostrategic landscape Sovereignty and maritime entitlements South China Sea policies of major claimants Natural resources and environment Cooperation and institutions Challenges and prospects Written by world renowned experts and scholars with specialisms from geography to international law the volume s 25 chapters contribute interdisciplinary perspectives reflecting the impact of how South China Sea policies are shaped by national governments and international organizations As such the Handbook provides an authoritative reference to South China Sea Studies useful for students and scholars of international relations history maritime and Asian studies **The Members' Annual Containing Information about the Los Angeles Chamber of Commerce** Los Angeles Chamber of Commerce, 1904 Patriotic Illustrations for Public Speakers William Herbert Brown, 1919 Official Records , 1999 **America at War** Albert
