needs of these students How can scholars community activists and parents collaborate for the benefit of Latino learners in the United States **Technologies in the Second Language Composition Classroom** Joel Bloch,2008 Grounded in applied linguistics research and composition theory and practice Technologies in the Second Language Composition Classroom encourages teachers to explore the role technology can play in the acquisition of writing for second language students This research based volume supports the incorporation of technology into classrooms providing students with motivation and tools to develop their writing skills The book provides not only an intellectually engaging perspective on the on going debates regarding technologically enhanced writing and writing pedagogy but it also delves in to the technologies themselves from blogs and blogging to computer mediated discourse and concordancing Technology is a growing and rapidly evolving presence in academia and Joel Bloch brings an informed approach to understanding its place and potential benefits in the classroom Each chapter includes reflection questions that will help individual readers apply the theories and ideas to their own classrooms This book will interest ESL teachers in training teacher educators current ESL instructors and researchers and scholars in the area of ESL writing and technology

*Minority Access to Information Technology* Harry Pachon,Elsa E. Macias,Paula Y. Bagasao,2000 **Knowledge & Power in the Global Economy** David Gabbard,2008 The second edition of Knowledge and Power in the Global Economy examines how neoliberal and neoconservative policies are working in tandem to privatize and commercialize public schools It looks at how these policies and the agendas behind them have impacted the internal dynamics of school management teaching and learning as well as how they have transformed the external dynamics of education from a public good or service offered to serve public interests to a private enterprise primarily serving private interests In addition to information critique and analysis multiple perspectives are provided that readers can draw upon to formulate an alternative vision of education as a crucial element of social change along democratic and egalitarian lines The first edition of this volume provided a critical encyclopedic approach to the rhetoric of educational reform as it developed from the 1980s through the 1990s critiquing its vocabulary elaborating the multiplicity of ways that the logic of neoliberalism and the emerging patterns of high stakes testing and accountability were impacting the curriculum and introducing ideas associated with alternative and liberatory educational projects Since its publication in 2000 policy developments such as the No Child Left Behind Act of 2001 in the U S and others in the U K and other parts of the world have nationalized and intensified these patterns deepening the logic and extent of neoliberalism s hold over educational reforms At the same time it is impossible to understand the current crises in education solely in terms of neoliberalism the impact of neoconservatism must also be considered Hence this second edition has a new subtitle The Effects of School Reform in a Neoliberal Neoconservative Age This edition is structured around five themes Political and Social Foundations Anti Educational Foundations The Set Up Anti Educational Foundations The Trap Classroom Consequence Democracy s Path This volume will particularly interest scholars and professionals across the fields of educational foundations curriculum

theory and educational policy and is well suited as a text for courses in these areas

**Digital Literacies for Learning**  
Allan Martin, Dan Madigan, 2006 In the 21st century digital tools enable information to be generated faster and in greater profusion than ever before to the point where its extent and value are literally beyond imagining Such quantities can only be meaningfully addressed using more digital tools and thus our relationship to information is fundamentally changed This situation presents a particular challenge to processes of learning and teaching and demands a response from both information professionals and educators Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments This collection brings together a global community of educators educational researchers librarians and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology Traditional notions of literacy need to be challenged and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners Leading international experts from the USA Canada Australia New Zealand South Africa Mexico and throughout Europe contribute to the debate and Hannelore Rader Librarian and Dean of the University Libraries University of Louisville Kentucky provides the foreword The book is in two parts In Part 1 Literacies in the Digital Age the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e learning environment In Part 2 Enabling and Supporting Digital Literacies the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student centred environment within the broader perspective of learning Readership This book takes the issues raised in the successful Information and IT Literacy also co edited by Allan Martin into a broader context It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age
