Zimmerman,2001-07 MANAGEMENT ACCOUNTING 2 e is written for the future user of accounting information While the preparation of accounting information is an important skill this text focuses on the analysis of the information generated by the accounting system for both planning and control decisions For this reason business majors and current and future managers will benefit greatly from the material presented Accounting majors will also gain a better understanding of how accounting information is used for effective planning and control within all types of organizations MANAGEMENT ACCOUNTING 2 e has a conceptual framework that focuses on using accounting information to make decisions that are reinforced through the use of numerical examples Most textbooks cover concepts in isolation providing only half of the picture McWatters gives students the big picture of real world accounting by incorporating decision making in every chapter The authors of this textbook firmly believe that students learn best when they can relate important concepts to the overall objective of management accounting helping to achieve customer and organizational value through sound business decision making **Introduction to Accounting** Penne Ainsworth,Dan Deines,2003-03 This textbook integrates financial and managerial accounting as opposed to keeping these areas separate the approach followed by most books and curriculums By integration we mean the authors focus on the business process and examine the activities from both an external financial reporting perspective and an internal management decision making perspective The text incorporates real world applications including actual financial statements to reinforce the relevance of topics to real business situations and promote student interest The text also promotes active learning through Pause Reflect probing questions placed sporadically throughout each chapter Of Interest boxes that provide additional information relating to the chapter concepts new Fast Fact boxes that provide additional information related to chapter concepts in a short trivia like manner and end of chapter group exercises

There are three key distinctions to the Ainsworth Deines approach They are 1 Integration described in preceding paragraph 2 Within the context of business processes Ainsworth Deines is organized by planning for activities performing those activities in other words capturing them in the financial statements and finally evaluating those business activities 3 An organization around the Statement of Cash Flows first focusing on Operating Activities what is my business my product who are my customers and then Financing and Investing Activities how do I fund my business how do I expand what are the financial risks etc
