Management Incentive Compensation Plans:

Management Incentive Compensation Plans Stephen A. Butler, Michael Maher, 1986 How to Design and Install Management Incentive Compensation Plans Dale A. Arahood, 1993 **A Study of Management Incentive Compensation Plans** Robert M. Mix, 1952 *Designing Effective Incentive Compensation Plans* Sal DiFonzo, 2015-12-15 Drawing on two decades of compensation experience Sal DiFonzo explores how to transition a firm from a traditional discretionary plan to a contemporary structured incentive compensation plan. The issues in this process can be complex but DiFonzo simplifies them by taking the reader step by step through the rationale behind creating a structured incentive compensation plan, each phase of the creation process and expert strategies for solving the issues that invariably arise with changes to compensation. While examples are drawn from the design and construction industry, firms from all industries seeking to drive strategy, engage employees and achieve success will find this book to be a valuable guide.

The Complete Guide to Sales Force Incentive Compensation Andris Zoltners, Prabhakant Sinha, Sally Lorimer, 2006-08-07 A well designed and implemented incentive program is an essential tool for building a motivated, highly effective sales force that delivers the results you need. Incentive programs are seductively powerful but complicated instruments. Without careful planning and implementation, they can be too stingy to motivate, too complex to understand, too quick to reward mediocre results, and too difficult to implement. *The Complete Guide to Sales Force Incentive Compensation* is a practical, accessible, detailed roadmap to building a compensation system that gets it right by creating motivating incentives that produce positive outcomes. Packed with hundreds of real life examples of what works and what doesn't, this important guide helps you understand the value of building an incentive plan that is aligned with your company's goals and culture. Avoid the common trap of overusing incentives to solve too many sales management problems. Measure the effectiveness of your current incentive program, employing easy to use tools and metrics for pinpointing its weak spots. Design a compensation plan that attracts and retains successful salespeople, including guidelines for determining the correct pay level, the best salary incentive mix, the proper performance measures, and the right performance payout relationship. Select an incentive compensation plan that works for your organization, then test the plan before it is launched. Set territory level goals that are fair and realistic and avoid overpaying the sales force or demoralizing salespeople by having difficult goals or not fairly assigned. Create and manage sales contests, SPIFFs, Special Performance Incentive for Field Force, and recognition programs that consistently deliver the intended results. Manage a successful transition to a new compensation plan and build efficient administration systems to support your plan. Filled with ready to use formulas and assessment tools and a wealth of insights from frontline sales managers and executives, *The Complete Guide to Sales Force Incentive Compensation* is your hands on, easy to read, playbook for crucially important decisions.

Regulating Utilities with Management Incentives Kurt A. Strasser, Mark Kohler, 1989-12-11 This book proposes a new approach to the government regulation of utilities Arguing that traditional command and control regulation does not encourage efficient performance Strasser and Kohler advocate the use of an incentive based regulatory system and offer a practical realistic strategy for the successful implementation of such plans within the context of utility regulation The analysis is supported by a comprehensive survey of the relevant legal materials an overview of the literature on organization theory and institutional economics and a survey of the latest thinking on how incentives can most effectively be paid Strasser and Kohler begin by identifying problems associated with current regulatory techniques demonstrating that disincentives are often built into the regulatory system When that system has tried incentives the authors show they have been applied in an ad hoc manner further exacerbating the problem In presenting the case for incentive based regulation the authors review the history of comprehensive incentive plans look at what organization theory can teach us about using incentives as a regulatory strategy and explore the effective use of incentive compensation by nonregulated companies Strasser and Kohler then develop a strategy for implementing incentive plans in regulated utilities showing that in order to work the plans must include the installation of clearly defined bonuses and penalties specific standards of performance the payment of bonuses to managers rather than shareholders and reliable and complete measures of company performance Policymakers economists public utility regulators and attorneys involved in the complex arena of utility regulation will find Regulating Utilities with Management Incentives indispensable reading
