Managing Disaster Risk in Emerging Economies Alcira Kreimer, Margaret Arnold, 2000-01-01 In 1999 natural catastrophes and man made disasters claimed more than 105 000 lives 95 percent of them in the developing world and caused economic losses of around US 100 billion. In 1998 the twin disasters of the Yangtze and Hurricane Mitch accounted for two thirds of the US 65 billion loss. The geographical areas affected may vary but one constant is that the per capita burden of catastrophic losses is dramatically higher in developing countries. To respond to an increased demand to assist disaster recovery programmes the World Bank set up the Disaster Management Facility in 1998 to help provide the Bank with a more rapid and strategic response to disaster emergencies. The DMF focuses on risk identification risk reduction and risk sharing transfer the three major topics in this volume. The DMF also promotes strategic alliances with key private government multilateral and nongovernmental organisations to ensure the inclusion of disaster risk reduction as a central value of development. The most important of these partnerships is the ProVention Consortium launched in February 2000 based on the premise that we must all take responsibility for making the new millennium a safer one.

Managing Disaster Risks to Cultural Heritage Bijan Rouhani, Xavier Romão, 2023-11-15 *Managing Disaster Risks to Cultural Heritage* presents case studies from different regions in the world and establishes a framework for understanding identifying and analysing disaster risks to immovable cultural heritage. Featuring contributions from academics and practitioners from around the globe the book presents a comprehensive view of the scholarship relating to cultural heritage disaster risk preparedness and post disaster recovery. Particular attention is given to the complex and dynamic nature of disaster risks and how they evolve during different phases of a catastrophic event especially as hazards can create secondary effects that have greater impacts on cultural heritage infrastructure and economy. Arguing that risk preparedness and mitigation have historically been secondary to reactive emergency and first aid response the book demonstrates that preparedness plans based on sound risk

assessments can prevent hazards from becoming disasters Emphasising that the protection of cultural heritage through preparedness mitigation actions and risk adaptation measures especially for climate change can contribute to the resilience of societies the book highlights the vital role of communities in such activities Managing Disaster Risks to Cultural Heritage will be useful to students professionals and scholars studying and working with cultural heritage protection It will be of particular interest to those working in the fields of Cultural Heritage Archaeology Conservation and Preservation Sustainable Development and Disaster Studies
