## **Managing Common Pool Resources Principles And Case Studies:**

**Managing Common Pool Resources** Katar Singh, 1994 Common Pool Resources CPRs or natural resources used by people in common constitute a significant proportion of the earth's total endowment. Most of these resources are overexploited and then neglected. This unique work combines theoretical and empirical approaches to CPR development and management in India. It addresses basic concepts, the role of CPRs, theoretical models for analyzing CPR problems, alternative CPR management systems, instruments of CPR policy, and decision making tools and techniques. Next, case studies of different forms of CPR management from various parts of India are examined. They indicate that success can be achieved under various management systems and there is no single best system appropriate for all situations and all times. Lastly, Katar Singh synthesizes the insights gained from an analysis of the basic concepts of CPRs and analytical lessons and conclusions drawn from the case studies into a coherent and environmentally sound policy for development and management of CPRs.

**Property Law and Economics** Boudewijn Bouckaert, 2010-01-01 This book contains illuminating and carefully written literature reviews on the central topics of the economics of property rights and institutions. As a bonus, it includes two fascinating chapters on topics off the beaten path: slavery and new types of property rights in environmental goods. This book will be indispensable for students and experienced scholars alike. Eric Posner, University of Chicago Law School, US. This study covers property law and property rights, providing a full summary and comprehensive bibliography of the existing law together with discussion from an economic perspective on the most important aspects of property law. Leading experts have brought together their knowledge and insight on a full range of issues, including comparative property law and the history of property law, to create a truly autonomous interdisciplinary resource. This essential reference work will strongly appeal to scholars and students enrolled in academic programmes of law and economics. Academic lawyers involved in research and teaching of private common law, practicing lawyers in the field of real estate law, as well as economists involved in researching development economics and transition economics, will also find this an invaluable resource. **Common Goods**

Adrienne Héritier, 2002-05-28 As European countries become more interdependent, the provision of common goods increasingly must be organized across national boundaries, levels of government, and sectors. In addition, former adversaries in the public and private sectors must learn to collaborate rather than compete. These changing paradigms call for new institutional and instrumental arrangements that move beyond existing modes of national governance. Offering a unique focus on the emerging role of private actors, this volume explores the evolving challenge of governing common goods in an increasingly transnational environment. The first systematic analysis of institutional solutions for providing common goods, this book shows how hierarchies established over centuries of nation-state rule have become obsolete, while negotiation and self-regulation have grown in importance. The contributors explore innovative solutions to the collective action problems countries encounter when clear lines of traditional authority dissolve. **Common Pool Resources and Collective Action**
