**Mathematical Theory of Nonequilibrium Steady States** Da-Quan Jiang, Donghua Jiang, 2004 *Mathematical Theory of Nonequilibrium Steady States* Da-Quan Jiang, Ming-Ping Qian, 2014-01-15 **Mathematical Theory of Nonequilibrium Steady States** Da-Quan Jiang, Min Qian, Ming-Ping Qian, 2003-12-08 This volume provides a systematic mathematical exposition of the conceptual problems of nonequilibrium statistical physics such as entropy production irreversibility and ordered phenomena Markov chains diffusion processes and hyperbolic dynamical systems are used as mathematical models of physical systems A measure theoretic definition of entropy production rate and its formulae in various cases are given It vanishes if and only if the stationary system is reversible and in equilibrium Moreover in the cases of Markov chains and diffusion processes on manifolds it can be expressed in terms of circulations on directed cycles Regarding entropy production fluctuations the Gallavotti Cohen fluctuation theorem is rigorously proved **Saint Dominic Original Indian Souvenir**, 1917 A fundraising publication for the rebuilding of the St Domonic Church at Rush Lake the booklet contains a photograph of the church a portrait of the founder Fr Louis Baroux a brief history of the church and the local Potawatomi people and anecdotes and poems *Journal of the Royal Society, Interface*, 2009 **6th International Conference on New Theories, Discoveries and Applications of Superconductors and Related Materials**, 2007 *The Nonequilibrium Statistical Mechanics of Simultaneous Steady-state Transport of Water and Solutes in Soils* Philippe Baveye, 1985 **Beyond Partial Differential Equations** Horst Reinhard Beyer, 2007-04-04 The present volume is self contained and introduces to the treatment of linear and nonlinear quasi linear abstract evolution equations by methods from the theory of strongly continuous semigroups The theoretical part is accessible to graduate students with basic knowledge in functional analysis Only some examples require more specialized knowledge from the spectral theory of linear self adjoint operators in Hilbert spaces Particular stress is on equations of the hyperbolic type since considerably less often treated in the literature Also evolution equations from fundamental physics need to be compatible with the theory of special relativity and therefore are of hyperbolic type Throughout detailed applications are given to hyperbolic partial differential equations occurring in problems of current theoretical physics in particular to Hermitian hyperbolic systems This volume is thus also of interest to readers from theoretical physics *Proceedings*, 2008 **Journal of the Physical Society of Japan**, 2009 *Mathematical Reviews*, 2007 *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.), 2003 *Reviews in Global Analysis, 1980-86 as Printed in Mathematical Reviews*, 1988 **The Mathematical Theory of Diffusion and Reaction in Permeable Catalysts: The theory of the steady state** Rutherford Aris, 1975 *Journal of Mathematical Biology*, 1981 **Progress of Theoretical Physics**, 1990 *Theory and Application of Hyperbolic Systems of Quasilinear Equations* Hyun-Ku Rhee, Rutherford Aris, Neal Russell Amundson, 1986 **Monte Carlo and Molecular Dynamics of Condensed Matter Systems** Kurt Binder, Giovanni Ciccotti, 1996 *LNM*, 2008

## **Construction of Global Lyapunov Functions Using Radial Basis**

**Functions** Peter Giesl, 2007-04-04 The basin of attraction of an equilibrium of an ordinary differential equation can be determined using a Lyapunov function A new method to construct such a Lyapunov function using radial basis functions is presented in this volume intended for researchers and advanced students from both dynamical systems and radial basis functions Besides an introduction to both areas and a detailed description of the method it contains error estimates and many examples
