Mathematicians As Enquirers Learning About Learning Mathematics:

Mathematicians as Enquirers Leone L. Burton, 2004-04-30 It is amazing that the usual reply to being introduced to a mathematician is a stumbling apology about how bad someone is at mathematics no matter how good they may be in reality. The problem is that we have come to view mathematics as an arcane branch of knowledge that only a few can aspire to understand or grasp. The sense of separation between those who have the knowledge and those who do not is present even amongst academics where many of the same skills and research practices exist: intuition, the use of symbolic structures and the use of intuition and insight. The more worrying aspect of this separation is the ever declining numbers of students choosing mathematics as part of their curriculum beyond the stage when it is mandatory. Even worse it would seem that the mathematics community has created a discriminatory environment that deters many students from continuing beyond secondary and tertiary education. Exit interviews with graduates show a stark rejection of their previously chosen subject. What about mathematicians themselves: how do they see themselves? Do male and female mathematicians come to know their mathematics in different ways? Do they tackle different problems with varying results for their status in the research community? Does the pervasive labelling that mathematics is a male domain arise because of a lack of role models for women or through its highly competitive hierarchical nature? Are the negative labels often associated with mathematics i.e.

Becoming a Mathematician Leigh N Wood, Peter Petocz, Anna Reid, 2012-02-13 This book considers the views of participants in the process of becoming a mathematician: that is the students and the graduates. This book investigates the people who carry out mathematics rather than the topics of mathematics. Learning is about change in a person: the development of an identity and ways of interacting with the world. It investigates more generally the development of mathematical scientists for a variety of workplaces and includes the experiences of those who were not successful in the transition to the workplace as mathematicians. The research presented is based on interviews, observations and surveys of students and graduates as they are finding their identity as a mathematician. The book contains material from the research carried out in South Africa, Northern Ireland, Canada and Brunei as well as Australia.

Mathematicians' Reflections on Teaching Sepideh Stewart, 2023-08-07 This book opens the case on collaboration among mathematicians and mathematics educators. The authors of this book provide their research and experience based insights on collaboration to inspire the young generation of the mathematics community to engage in productive collaborations and exchange of knowledge early in their careers. These valuable collaborations are anticipated to generate innovative research questions that set new and novel paths for mathematics education research with ample possibilities yet to be realized and discovered.

Mathematics and Beauty Nathalie Sinclair, 2006-09-08 In this innovative book Nathalie Sinclair makes a compelling case for the inclusion of the aesthetic in the teaching and learning of mathematics. Using a provocative

set of philosophical psychological mathematical technological and educational insights she illuminates how the materials and approaches we use in the mathematics classroom can be enriched for the benefit of all learners While ranging in scope from the young learner to the professional mathematician there is a particular focus on middle school where negative feelings toward mathematics frequently begin Offering specific recommendations to help teachers evoke and nurture their students aesthetic abilities this book Features powerful episodes from the classroom that show students in the act of developing a sense of mathematical aesthetics Analyzes how aesthetic sensibilities to qualities such as connectedness fruitfulness apparent simplicity visual appeal and surprise are fundamental to mathematical inquiry Includes examples of mathematical inquiry in computer based learning environments revealing some of the roles they play in supporting students aesthetic inclinations

Thomase,2008 This is hardly another field in education which is more important for a country s future than science education Yet more and more students elect to concentrate on other fields to the exclusion of science for a variety of reasons 1 The perception of degree of difficulty 2 The actual degree of difficulty 3 The lack of perceived prestige and earnings associated with the field 4 The dearth of good and easy to use texts 5 The lack of society in comprehending the significance of science and creating attractive incentives for those who enter the field This new book focuses on issues of primary significance in the field

Genderwatch Kate Myers,Hazel Taylor,Sue Adler,Diana Leonard,2007 The first Genderwatch was published twenty years ago for teachers and school leaders who wanted to do something about discriminatory practices in their schools but were not quite sure what This entirely new edition designed to coincide with the Gender Equality Duty legislation coming into force in 2007 will help the same professional group Times have changed but significant differences in children s schooling experiences persist depending on who they are Genderwatch still watching focuses on gender difference also taking into account that boys and girls come from diverse backgrounds cultures and heritages The book contains sixty schedules covering all aspects of school life and all phases from preschool to secondary They examine whole school issues such as inclusion what happens in assemblies working with boys working with girls how to ensure that when young people s views are sought all are heard and the book offers detailed accounts of what might be done in each curriculum subject Each schedule will help schools address their gender equality issues through reviewing practice tackling inequalities and monitoring outcomes Genderwatch still watching is essential reading for teachers school leaders support staff governors inspectors advisers and consultants in fact for anyone who wants to improve equality of opportunity in schools The seventy contributors are educational practitioners and advisers and academics All are donating their royalties to Book Aid International a charity that provides books to libraries hospitals refugee camps and schools in sub Saharan Africa and Palestine
