Die Wende Von Der Aufklärung Zur Romantik

1760-1820 Horst Albert Glaser, György Mihály Vajda, 2000 This volume is the twelfth to date in a series of works in French or English presenting the epochs and movements of a Comparative History of Literatures in European Languages *Histoire Comparée des Littératures de Langues Européennes* The original intention of the editors was to publish a four volume history of European literature from 1760 1820 and the first of these volumes *Des Lumières au Romantisme Genres en Vers* appeared as long ago as 1982 The volumes *Genres en Prose* and *Théâtre* are still awaited In their absence the present volume *Epoque im_berblick* attempts a more comprehensive and rigorous treatment of the period and its historiographical problems than was initially planned providing the reader with an overview of sixty eventful years of European literary history years in which German Classicism coincided with the birth initially in Germany and England of Romanticism And at the centre of this turbulent period of European intellectual and literary history stands the French Revolution *Complexity and*

Entrepreneurship Andreas Liening, 2024-07-03 Starting from the question of what systematic peculiarities in the behavior of leaders and entrepreneurs need to be considered this book provides a new theoretical perspective for entrepreneurial analysis evaluation decision making and action Various theories of complex systems such as the theory of self organization synergetics are presented Additionally methodological approaches for the empirical examination of complexity and the resulting consequences in the field of entrepreneurship are discussed Overall it suggests that old models like the Laplacean worldview or Kant's question of what we can know need to be reconsidered This book offers surprising answers particularly revealing new opportunities and possibilities in complex processes like starting a business The second expanded and updated edition strengthens the focus on entrepreneurship as the book's main theme It includes new and current examples from the real economy as well as additional empirical data supporting the model analysis *Praxis der Mathematik*, 1994
