**Maths for Chemists: Numbers, functions and calculus** Martin Cockett, Graham Doggett, 2003 An excellent resource for students who need support and understanding in working with the diverse mathematical tools required in a typical chemistry degree course

Maths for Chemists Martin Cockett, Graham Doggett, 2012 The two volumes of Maths for Chemists provide an excellent resource for all undergraduate chemistry students but are particularly focussed on the needs of students who may not have studied mathematics beyond GCSE level or equivalent The texts are introductory in nature and adopt a sympathetic approach for students who need support and understanding in working with the diverse mathematical tools required in a typical chemistry degree course The early chapters of Maths for Chemists Volume I Numbers Functions and Calculus provide a succinct introduction to the important mathematical skills of algebraic manipulation trigonometry numbers functions units and the general grammar of maths Later chapters build on these basic mathematical principles as a foundation for the development of differential and integral calculus In spite of the introductory nature of this volume some of the more important mathematical tools required in quantum chemistry are deliberately included through a gradual introduction to and development of the concept of the eigenvalue problem Ideal for the needs of undergraduate chemistry students

Tutorial Chemistry Texts is a major series consisting of short single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses Each book provides a concise account of the basic principles underlying a given subject embodying an independent learning philosophy and including worked examples

Maths for Chemists: Power series, complex numbers and linear algebra Martin Crockett, 2003

Maths for Chemistry Paul Monk, Lindsey J. Munro, 2021-08-11 Mathematical skills and concepts lie at the heart of chemistry yet they are the aspect of the subject that many students fear the most Maths for Chemistry recognizes the challenges faced by many students in equipping themselves with the maths skills necessary to gain a full understanding of chemistry Working from foundational principles the book builds the student's confidence by leading them through the subject in a steady progressive way from basic algebra to quantum mathematics Opening with the core mathematics of algebra logarithms and trigonometry the book goes on to cover calculus matrices vectors complex numbers and laboratory mathematics to cover everything that a chemistry student needs With its modular structure the book presents material in short manageable sections to keep the content as accessible and readily digestible as possible Maths for Chemistry is the perfect introduction to the essential mathematical concepts which all chemistry students should master
