**Mathematics Matters in Education** Yeping Li, W. James Lewis, James J. Madden, 2017-10-03 This book is inspired by Roger E Howe's contributions to the international communities of mathematics and mathematics education. Renowned for his research contributions in the fields of representation theory, automorphic forms, harmonic analysis, and invariant theory, Dr Howe has also fundamentally deepened our understanding of the mathematics taught in the early school grades and has challenged and stimulated mathematicians and mathematics educators to work together to examine this part of the mathematical universe more critically and in imaginative new ways. This volume will help summarize and highlight Howe's contributions to several topic areas in mathematics education, demonstrating the possibility and importance of engaging mathematicians in high impact research in mathematics education and showcasing the importance of cross disciplinary collaboration and exchange.

**Maths Matters** Máire Edwards, 2004      **Achieving Further** Daniel Slosberg, 2016-01-07 Do you have students who are far ahead of their peers in math? Are you a teacher who differentiates for those students by giving them additional topics but without knowing what topics they have already covered over the past years and without a plan for the topics they should cover in the next years? Are you a head of department who wants to streamline differentiation throughout your math department to ensure talented students have a more uniform experience as they move from teacher to teacher and have a goal they are working towards year after year? Are you a principal who wants to improve the results of your students in HL Math and to have students from your school start succeeding in HL Further Math? If so, this book describes a program to prepare IB Middle Years Program (MYP) students to enter the Diploma Program (DP) taking HL Further Math as their only math course. The program is modeled on the ATYP program from Kalamazoo, MI, started by Carol McCarthy.
