## **Matthew Boulton:**

Matthew Boulton H. W. Dickinson, 1937 This 1939 work gives deserved recognition to the achievements of the engineer and businessman Matthew Boulton. Boulton's importance has generally been overshadowed by that of his partner James Watt but he was a significant figure in his own right particularly in relation to the Soho Foundry and his production of coins and medals. He belonged to a network of highly significant men of the period including Josiah Wedgwood, Erasmus Darwin and Benjamin Franklin and was a founding member of the Lunar Society of Birmingham. An engineer by profession H. W. Dickinson researched widely and published highly readable works on the history of the steam engine. Watt and Trevithick also reissued in this series. He succeeds in producing a work which appeals to the scientist, the historian and the general reader without feeling obliged to oversimplify the technical details.

**Matthew Boulton** Dr Malcolm Dick, Mr Kenneth Quickenden, Ms Sally Baggott, 2013-02-28 Matthew Boulton was a leading industrialist, entrepreneur and Enlightenment figure. Often overshadowed through his association with James Watt, his Soho manufactories put Birmingham at the centre of what has recently been termed The Industrial Enlightenment. Exploring his many activities and manufactures and the regional, national and international context in which he operated, this publication provides a valuable index to the current state of Boulton studies. Combining original contributions from social, economic and cultural historians with those of historians of science, technology and art, archaeologists and heritage professionals, the book sheds new light on the general culture of the eighteenth century, including patterns of work, production and consumption of the products of art and industry. The book also extends and enhances knowledge of the Enlightenment, industrialization and the processes of globalization in the eighteenth century.

Ormolu: the Work of Matthew Boulton Nicholas Goodison, 1974 *The Life and Legend of James Watt* David Philip Miller, 2019-04-18 The Life and Legend of James Watt offers a deeper understanding of the work and character of the great eighteenth century engineer. Stripping away layers of legend built over generations, David Philip Miller finds behind the heroic engineer a conflicted man often diffident about his achievements but also ruthless in protecting his inventions and ideas and determined in pursuit of money and fame. A skilled and creative engineer, Watt was also a compulsive experimentalist drawn to natural philosophical inquiry and a chemistry of heat underlay much of his work, including his steam engineering. But Watt pursued the business of natural philosophy in a way characteristic of his roots in the Scottish improving tradition that was in tension with Enlightenment sensibilities. As Miller demonstrates, Watt's accomplishments relied heavily on collaborations not always acknowledged with business partners, employees, philosophical friends and not least his wives, children and wider family. The legend created in his later years and afterlife claimed too much of nineteenth century technology for Watt but that legend was and remains a powerful cultural force.
