Man Weather Sun:

The Empire of Climate David N. Livingstone, 2026-03-31 How the specter of climate has been used to explain history since antiquity Scientists journalists and politicians increasingly tell us that human impacts on climate constitute the single greatest threat facing our planet and may even bring about the extinction of our species Yet behind these anxieties lies an older much deeper fear about the power that climate exerts over us *The Empire of Climate* traces the history of this idea and its pervasive influence over how we interpret world events and make sense of the human condition from the rise and fall of ancient civilizations to the afflictions of the modern psyche Taking readers from the time of Hippocrates to the unfolding crisis of global warming today David Livingstone reveals how climate has been critically implicated in the politics of imperial control and race relations been used to explain industrial development market performance and economic breakdown and served as a bellwether for national character and cultural collapse He examines how climate has been put forward as an explanation for warfare and civil conflict and how it has been identified as a critical factor in bodily disorders and acute psychosis A panoramic work of scholarship *The Empire of Climate* maps the tangled histories of an idea that has haunted our collective imagination for centuries shedding critical light on the notion that everything from the wealth of nations to the human mind itself is subject to climate's imperial rule *Weather, Climate, and the Geographical Imagination* Martin

Mahony, Samuel Randalls, 2020-03-24 As global temperatures rise under the forcing hand of humanity's greenhouse gas emissions new questions are being asked of how societies make sense of their weather of the cultural values which are afforded to climate and of how environmental futures are imagined feared predicted and remade *Weather Climate and Geographical Imagination* contributes to this conversation by bringing together a range of voices from history of science historical geography and environmental history each speaking to a set of questions about the role of space and place in the production circulation reception and application of knowledges about weather and climate The volume develops the concept of geographical imagination to address the intersecting forces of scientific knowledge cultural politics bodily experience and spatial imaginaries which shape the history of knowledges about climate *Man, Weather, Sun* William Ferdinand

Petersen, 1949 **An Introduction to the History of Chronobiology, Volume 1** Jole Shackelford, 2022-09-20 In three volumes historian Jole Shackelford delineates the history of the study of biological rhythms now widely known as chronobiology from antiquity into the twentieth century Perhaps the most well known biological rhythm is the circadian rhythm tied to the cycles of day and night and often referred to as the body clock But there are many other biological rhythms and although scientists and the natural philosophers who preceded them have long known about them only in the past thirty years have a handful of pioneering scientists begun to study such rhythms in plants and animals seriously Tracing the intellectual and institutional development of biological rhythm studies Shackelford offers a meaningful evidence based account of a field that today holds great promise for applications in agriculture health care and public health Volume 1

follows early biological observations and research chiefly on plants volume 2 turns to animal and human rhythms and the disciplinary contexts for chronobiological investigation and volume 3 focuses primarily on twentieth century researchers who modeled biological clocks and sought them out including three molecular biologists whose work in determining clock mechanisms earned them a Nobel Prize in 2017 *New York School Journal* ,1895 **The Churchman** ,1929 **The Sunday-school World** ,1900 **Men** ,1896 **Monthly Weather Review** ,1894 **American Illustrated Magazine** ,1928 **Cycles** ,1989 **The Sunday Magazine** ,1889 **Monthly Weather Review** Canada.
