Managing Death:

Managing Death: International Perspectives Gerry R. Cox, Neil Thompson, 2022-09-23 There is a huge collection of literature relating to death grief and bereavement but one aspect that has received relatively little attention is that of death management practices by which we mean the various ways of managing the circumstances of the death ritually acknowledging it and sensitively handling the disposal of the body and so on While ways of disposing of the dead and grief practices have been thought of as based upon individual responses grief and bereavement practices can be understood not only by looking at psychological and medical frameworks but also by examining people as part of a complex structure of social arrangements institutions structures and patterns By examining the social and institutional structures of various groups around the world we provide an international framework for a better understanding of the study of dying death and bereavement This book highlights the significance of these matters in an international context reflecting common themes and important differences It will highlight common themes across diverse cultures and national settings while also drawing attention to significant differences If professionals working in the field of death grief and bereavement are not aware of such differences their practice can be insensitive discriminatory and therefore ineffective if not actually counterproductive As such the book provides an invaluable resource for a wide variety of professionals and students including medicine and health care social work counselling and psychotherapy chaplaincy and pastoral work and of course those involved in the funeral industry In addition students of sociology psychology and anthropology will find much of interest here in terms of appreciating the diversity of ways in which funerals and other death management practices are managed and integrated into social life

about the type of medical treatment but also the termination of life is an empowering and progressive stride both for health and humanity. Health or rather ill health is a personal choice that requires a critical dialogue between the medical community, family members, religious leaders, and of course one's own concerns, all addressed within a legal framework. The current debate about euthanasia has gone on in the Netherlands for over 70 years, and this book provides a clear and balanced guide to the questions surrounding the end of life. Doeke Post also provides suggestions on how to regulate the timely power of attorneys. The book is an analysis and vision from fifty years of experience in healthcare practice and policy. Recommended for professionals and lay people who are struggling with end-of-life issues.
