Mathematical Tourist Snapshots Of Modern Mathematics:

The Mathematical Tourist Ivars Peterson, 1998-04-15 In the first edition of *The Mathematical Tourist* renowned science journalist Ivars Peterson took readers on an unforgettable tour through the sometimes bizarre but always fascinating landscape of modern mathematics Now the journey continues in a new updated edition that includes all the latest information on mathematical proofs fractals prime numbers and chaos as well as new material on the relationship between mathematical knots and DNA how computers based on quantum logic can significantly speed up the factoring of large composite numbers the relationship between four dimensional geometry and physical theories of the nature of matter the application of cellular automata models to social questions and the peregrinations of virtual ants a novel mathematical model of quasicrystals based on decagon shaped tiles Blazing a trail through rows of austere symbols and dense lines of formulae Peterson explores the central ideas behind the work of professional mathematicians how and where their pieces of the mathematical puzzle fit in the sources of their ideas their fountains of inspiration and the images that carry them from one discovery to another

The Mathematical Tourist Ivars Peterson, 1988 In this revised updated edition of Peterson's classic work the author blazes a trail into mathematics' wilderness a domain of unsettled truths full of unanswered questions and shows us the wonderland beyond the thicket He presents the latest information on mathematical proofs fractals prime numbers and chaos as well as new material on such intriguing topics as the relationship between mathematical knots and DNA the application of cellular automata models to social questions and the significant increase in the speed of factoring large composite numbers by means of computers based on quantum logic Demystifying the major discoveries in mathematics Peterson explores the work of key mathematicians along with the sources of their ideas and inspiration He also shows how their discoveries fit into the mathematical puzzle and have spawned further developments More than 100 lively line drawings and sixteen color plates of computer generated images graphically illuminate the concepts From publisher description

Gaither's Dictionary of Scientific Quotations Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to

live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics CRC Concise Encyclopedia of Mathematics Eric W. Weisstein, 2002-12-12 Upon publication the first edition of the CRC Concise Encyclopedia of Mathematics received overwhelming accolades for its unparalleled scope readability and utility It soon took its place among the top selling books in the history of Chapman Hall CRC and its popularity continues unabated Yet also unabated has been the d **The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition** Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak A Post-Modern Perspective on Curriculum William E. Doll Jr., 1993 Doll draws relationships among the ideas advanced in chaos theory Piagetian epistemology cognitive theory and the work of Dewey and Whitehead In this book on the post modern perspective on the curriculum the author asserts that the post modern model of organic change is not necessarily linear uniform measured and determined but is one of emergence and growth made possible by interaction transaction disequilibrium and consequent equilibrium Transformation not a set course the book argues should be the rule and open endedness is an essential feature of the post modern framework In the book the author envisages a curriculum in which the teacher s role is not causal but transformative The curriculum is not the race course but the journey itself metaphors can be more useful than logic in generating dialogue in the community and educative purpose planning and evaluation is flexible and focused on process not product Scholarly yet direct and to the point Doll s
