[Maths Mazes: ...100](#)

[Mental Arithmetic Puzzles](#) Clarity Media,2019-01-19 Maths MazesWelcome to this fabulous all new collection of maths mazes

If you enjoy mazes and want to be able to practice maths and mental arithmetic in a fun and enjoyable way these maths mazes are for you Featuring four different difficulty levels there are easy medium hard and expert mazes in this book The mazes get bigger and the difficulty gets harder as you work through the book To start with the mazes just require addition and subtraction however as you work your way through to the harder difficulty levels you will also be required to perform multiplication and division too If you want to make the puzzles more straightforward you can work the sum out on a piece of paper If you want to make it harder you can try to perform the sum entirely in your head The puzzles function as a normal maze but there are sums along the solution route So once you ve found the solution go back through and work out the sum that passes through the solution route starting from 0 So if the first sum you find is 5 then you add 5 to zero to get 5 Then if the next sum is x4 then you calculate $5 \times 4 = 20$ and so on working through the sums in the order you reach them from start to finish in the maze We hope you enjoy these maths mazes and the combination of the fun of solving a maze and then having a mental arithmetic series of sums to perform too All the answers are at the back of the book so if you get stuck or want to check your answers at any time then you can do so
