since the book was first published The Articulate Classroom is an engaging introduction to the field which is still very relevant to today's readers It will remain an indispensable guide for teachers looking to extend their skills and a unique chance for education researchers to gain an overview from experts in the field *Let's Talk Math* Pat Lilburn, Pam Rawson, 1994 Grade level 1 2 3 4 5 6 p e i t *Mathematical Relationships in Education* Laura Black, Heather Mendick, Yvette Solomon, 2011-01-13 While demand for the mathematically literate citizen increases many learners continue to reject mathematics and experience it as excluding and exclusive even when they succeed at it In exploring this phenomenon this volume examines the ways in which learners form particular relationships with mathematics in the context of formal schooling Strong Foundations in Early Mathematics Lorna Earle, Sam Parkes, 2023-01-11 Developing the building blocks for mathematics This book supports early years teachers and practitioners to enable children to build Strong Foundations in Mathematics It focuses on children's learning and development in mathematics in the critical reception year It supports trainee teachers and early years students to reflect on their own mathematics learning and how this influences their teaching and subject confidence It acknowledges the uniqueness of the early years and explores the mathematical pedagogies of the EYFS Importantly the book challenges the assumption that early years mathematics is not proper maths

Thinking and Learning with ICT Rupert Wegerif, Lyn Dawes, 2004 Primary teachers need to incorporate the use of computers in their daily lesson plans but how can this be done most effectively to promote learning skills in the classroom In this fascinating book Lyn Dawes and Rupert Wegerif outline a strategy for enhancing the effectiveness of computers for teaching and learning with an emphasis on raising pupil achievement in the core subject areas developing collaborative learning in small groups using group discussions as a way of improving general communication as well as thinking and reasoning skills The approach is to use computers as a support for collaborative learning in small groups and this book presents ways to prepare pupils for talking learning and thinking together around computers Excerpts from pupils' discussions illustrate the main issues and guidance on lesson planning and developing and choosing appropriate software is also provided Thinking and Learning with ICT will be a valuable resource for primary teachers and student teachers

Parental Engagement and Out-of-School Mathematics Learning Tim Jay, Jo Rose, 2023-08-07 Challenging preconceived ideas and supporting children to acquire mathematical understandings Parental Engagement and Out of School Mathematics Learning informs innovative and vital educational policy and practice Number Talks Sherry Parrish, 2010 A multimedia professional learning resource Cover Intentional Talk and Listening Elham Kazemi, Allison Hintz, 2025-12-09 Math teachers know the first step to meaningful mathematics discussions is to ask students to share how they solved a problem and make their thinking visible however knowing where to go next can be a daunting task In Intentional Talk and Listening How to Structure and Lead Productive Mathematical Discussions Elham Kazemi and Allison Hintz provide teachers with a practical framework for planning and facilitating purposeful math talks that move group discussions to the next level

while achieving mathematical and social goals Each chapter focuses on a different type of conversation including Open Strategy Sharing Compare and Connect Why Let s Justify What s Strategic and Why Define and Clarify Troubleshoot and Revise In this second edition of the book Kazemi and Hintz provide new vignettes and classroom examples They explore the role of children s and communities funds of knowledge in mathematics problem solving and focus on supporting students active participation as listeners and speakers Written from the stance that all students are sense makers with valuable ideas Intentional Talk and Listening supports teachers decision making as they facilitate conversations that help students make meaning of and find joy in math

Educational Research and Innovation Developing Minds in the Digital Age Towards a Science of Learning for 21st Century Education Kuhl Patricia K.,Lim Soo-Siang,Guerriero Sonia, Van Damme Dirk,2019-04-10 This book highlights new scientific research about how people learn including interdisciplinary perspectives from neuroscience the social cognitive and behavioural sciences education computer and information sciences artificial intelligence machine learning and engineering

Talking Mathematics in School Magdalene Lampert,Merrie L. Blunk,1998-10-13 The teaching and learning of mathematics in K 12 classrooms is changing New curricula and methods engage learners in working on real problems An essential feature of this work involves teacher and students in talking mathematics How can students learn to do this kind of talking What can they learn from doing it This book addresses these questions by looking at the processes of formulating problems interpreting contexts in which problems arise and arguing about the reasonableness of proposed solutions The studies in this volume seek to retain the complexity of classroom practice rather than looking at it through a particular academic lens

Transforming Primary Mathematics Mike Askew,2015-11-19 Fully updated to reflect the new curriculum the revised edition of Transforming Primary Mathematics sets out key theories and cutting edge research in the field to enable teachers to take a fresh look at how they teach mathematics The book encourages teachers to reflect on their own beliefs and values about mathematics and asks them to question whether their current methods meet the needs of all learners and the challenge of having high expectations for all It provides clear practical approaches to help implement fundamental change in classroom environments and offers motivational teaching styles to ensure meaningful mathematics learning Chapters take an inspiring sometimes controversial and often unconventional look at the subject of mathematics by endorsing the use of a new mathematics one based on problem solving modelling inquiry and reasoning not on abstract rules memorising and regurgitation arguing that there is more to maths teaching than death by a thousand worksheets challenging norms such as the practice of sorting children into sets based on their perceived mathematical ability asking whether mathematical ability is innate or a result of social practices examining what a mastery approach might entail highlighting the role of variation in supporting learning advocating an environment where teachers are encouraged to take risks Transforming Primary Mathematics is for all primary school teachers who want to make mathematics welcoming engaging inclusive and successful
