The Oseberg Find Thorleif Sjøvold, 1963 *Old Norse Religion in Long-term Perspectives* Anders Andrén, 2006-01-01

The study of Old Norse Religion is a truly multidisciplinary and international field of research. The rituals, myths, and narratives of pre-Christian Scandinavia are investigated and interpreted by archaeologists, historians, art historians, historians of religion, as well as scholars of literature, onomastics, and Scandinavian studies. For obvious reasons, these studies belong to the main curricula in Scandinavia but are also carried out at many other universities in Europe, the United States, and Australia, a fact that is evident to any reader of this book. In order to bring this broad and varied field of research together, an international conference on Old Norse religion was held in Lund in June 2004. About two hundred delegates from more than fifteen countries took part. The intention was to gather researchers to encourage and improve scholarly exchange and dialogue, and Old Norse religion in long-term perspectives presents a selection of the proceedings from that conference. The 75 contributions elucidate topics such as worldview and cosmology, ritual and religious practice, myth and memory, as well as the reception and present-day use of Old Norse religion. The main editors of this volume have directed the multidisciplinary research project *Roads to Midgard* since 2000. The project is based at Lund University and funded by the Bank of Sweden Tercentenary Foundation.

The Oseberg Find and Other Viking Ship Finds Thorleif Sjøvold, 1957 **Materialities of Passing** Peter Bjerregaard, Anders Emil Rasmussen, Tim Flohr Sørensen, 2016-03-17

Passing is a common euphemism for the death of a person, as he or she is said to pass away or pass on. This open-ended saying has at its heart a notion of transformation from one state to another, which in turn grants the possibility of grasping or approximating the passage of time and the materiality of death and decay. This book begins with the idea that since all material things, whether animals, human beings, objects, or buildings, undergo some form of passing, then the specific transformation in these passages and the materiality actively given to it can offer us a grasp of otherwise precarious temporalities. It examines how human beings strive to relate to the temporal dimension of death and decay by giving new shape and direction to being and by examining its natural transformations. Focusing on the materiality of passing and thereby the relationship between embodiment, temporality, and death, *Materialities of Passing* offers rich case studies from Europe, Papua New Guinea, South Africa, and the Russian Far East for exploring the material, spatial, and directional aspects of the very interface between life and death. As such, it will appeal to scholars of anthropology, death studies, archaeology, philosophy, and cultural studies.

Ancient Queens Sarah M. Nelson, 2003. Shedding new light on the division of power, the essays in this volume explore the variety of roles and assumptions about queens from the Americas to Eurasia. Together, they provide a global tour of archaeological and historical queens that illustrate the intersection of gender and power in archaeology.
