The history of the hukou system and its instrumental role in Chinese urbanization and labor markets is explained and readers get a sense of what issues are prioritized by Chinese policymakers as they contemplate reform or change to this system from hukou based labor market discrimination inequality of opportunity multi dimensional poverty of rural migrants the public health consequences of non hukou migration and old age insurance for migrants without hukous. The author concludes with a stirring and practical call for hukou reform articulating a cost benefit model and providing an array of policy suggestions. Consequently global environmental governance has become a crucial challenge that relevant stakeholders must address. From the perspective of global governance it is essential to adhere to the commitments made in the Paris Agreement on Climate Change and implement the global greenhouse gas GHG reduction targets. This necessitates the collective responsibility of all regions to reduce their GHG emissions prompting the need to accelerate the adjustment of the economic structure. However it is important to acknowledge that participating in GHG reduction efforts can lead to economic emission reduction costs and increased uncertainties for the economic development of various countries. These factors might hinder the sustainable growth of regional economies and potentially diminish the enthusiasm of each region to engage in GHG reduction initiatives. Therefore alongside actively responding to climate change promoting the optimization and adjustment of regional economies has become a consensus among all countries. *Delhi, United Provinces, and Bihar and Orissa* India.
