

DUALISTIC THINKING

Dualistic thinking is a type of psychological reasoning according to which people perceive only two distinct and opposing options.

EXPLANATION

Dualistic thinking is often perceived and defined as a general tendency to map different concepts onto “mutually opposed categories” (Hoffman, 2021, p. 9). It is the reliance on binary thinking, with the notion that there are only two distinct sides to any issue.

EXAMPLE

This dichotomous argument explores whether humans' behaviors are more influenced by genetic or experiential factors. People who see the nature vs nurture issue as a binary rather than a spectrum or contextualized issue are falling victim to dualistic thinking.

Our Dualistic World Quest For Knowledge

James Lindsay

Our Dualistic World Quest For Knowledge:

The Path of Knowledge: from Dualism to AI Lucas Andrioli, 2025-04-11 The Path of Knowledge from Dualism to AI is a fascinating journey that explores how human thought has evolved from early philosophical ideas to the challenges of artificial intelligence Through revealing anecdotes and key characters this book shows the deep connections between philosophy science and technology and invites us to reflect on the impact of these advances on our daily lives and on what it means to be human How will AI influence our decisions and what we believe To what extent can our intuitions and ways of thinking coexist with the cold logic of machines And most importantly what does it really mean to be human in a world where artificial intelligence is constantly evolving With an accessible and engaging approach this book is ideal for those who want to understand the past and present of knowledge and for those who want to imagine the future in a world increasingly dominated by intelligent machines *Quest for Knowledge* George McCrossen, 1982-09-01 [The Publishers' Trade List Annual](#) ,1985 **To Test the Limits of Our Endurance** S. Giora Shoham, 2010 A new approach to culture and cultural patterns is elucidated through relating a theory of personality and social characters to the genesis of myths and religions Cultures are classified along a continuum and their relationship to a given personality structure is based on the assumptions that cultures possess generalized traits and that these traits relate to characters of individuals Cultures like man pass through the age phases of childhood youth manhood culminating in old age It is the cultural goals and the means to achieve them that become the culture pattern What are these cultural goals How do we achieve them Every society and culture has its own indigenous mythology Myths move in time from sacred myths recorded before history to modern myths like master detectives Sherlock Holmes and Hercule Poirot or the master spy John Le Carr c TM s Smiley or even Superman who realizes the dreams of omnipotence among the downtrodden henpecked inhabitants of Metropolis Thus myths provide meaning and motivation for human behavior A Return to Being Human Religiously John Gilmore, 2003-10 This book is a deep exploration of what it means to be both human and divine Since the beginning of authentic religion and higher philosophy the mystics from every tradition have given us one message You are a divine being and we humans animals the earth the sky the divine are one Jesus Lao Tze The Buddha Meister Eckhart Hildegard of Bingen have provided us with techniques that shake off the ego the false identity realize our greater identity For we are as those who are the birthers of the light and co creators with God You are the light of the world You are a co creator with god goddess All of the peace that you need and the power to live a joyful life dwells within you This book and the exercises within are one of the doors to your greater self Do you dare enter into the struggle that will lead you to your greatness *Religious Education and Critical Realism* Andrew Wright, 2015-11-19 Religious Education and Critical Realism Knowledge Reality and Religious Literacy seeks to bring the enterprise of religious education in schools colleges and universities into conversation with the philosophy of Critical Realism This book addresses the problem not of the substance of our primal beliefs about the ultimate nature of reality and our place

in the ultimate order of things but of the process through which we might attend to questions of substance in more attentive reasonable responsible and intelligent ways This book unpacks the impact of modern and post modern thought on key topics whilst also generating a new critically realistic vision Offering an account of the relationship between Religious Education and Critical Realism this book is essential reading for students scholars and practitioners interested in philosophy theology and education The Quest George Robert Stow Mead,1915 *Science Spirituality and Ontological Mysticism* Lalan Prasad Singh,2016-01-01 This book is the outcome of two decades of author s reflection over this subject Ontological mysticism is the basis for the philosophical and the scientific truth and reality Twenty first century is ushering in an era of spiritual renaissance There is a convergence of science and spirituality The relativity and quantum mechanics are coming closer to Vedantic and Buddhistic concept of truth and reality The book analyses and examines different philosophical and scientific concepts both from the transcendental and the relativistic perspective It has also introduced a new concept in the form of cosmic consciousness as the ultimate reality and the scientific and philosophical importance of subject or perceiver Subject or perceiver may be accepted as the fifth dimension The cosmic consciousness is the only reality that exists This book is full of paradoxes and contradictions it is full of allegories and metaphors they are not truths but pointer to deeper and profound truth Sometimes myths and metaphors fables and allegories speak out greater truth than truth itself as truth is mystical and metaphysical The Quest ,1918 **Quest** ,1913 **The Order of Knowledge** Geoffrey Powell,1993 This book offers a radical analysis of our contemporary cultural malaise by showing how our efforts to solve our problems are misdirected because they are built on fundamentally flawed intellectual commitments It takes seriously the analysis Plato gave of the logical dynamic of the mind body system created by classical culture and shows how the commitment to classical culture and classical solutions from the Renaissance to the present has led to a re enactment of Platonic logic In exploring the way in which our society has ordered its knowledge and educated to secure that order this book will provide a thought provoking analysis for philosophers social scientists and educationalists By distinguishing between the ideological burden of our classical inheritance and the achievements and possibilities of society freed from that burden it will give hope to those who rightly value the free market society but who know that its ideology harms its progress **The Sufi Quarterly** ,1929

Theory and Praxis Murzban Jal,Jyoti Bawane,2020-01-15 This book proposes a New Enlightenment a new way of looking at the non Western world Breaking new ground the essays chart a course beyond Eurocentric discourses which completely ignore the contributions of Asia Africa and Latin America and forms of nativism which are usually ethnocentric discourses The volume Focuses on the historical aspects of knowledge production and its colonization Examines the genre of multilinear histories that displaces hegemonic Eurocentric discourses Enlarges the scope of multilinear historicism whereby Asia Europe Africa and the Americas are drawn in a new humanistic knowledge system Studies how colonization is resisted in both the non Western and Western world Lucid and engaging this book will be of great interest to scholars and

researchers of social theory education politics and public policy **A Philosophical System of Theistic Idealism** James Lindsay, 1917 The Conquest of Illusion Jacobus Johannes Leeuw, 1928 *Michigan Journal of Community Service Learning*, 1995 South African Public Administration J. S. H. Gildenhuys, 1988 *The Wonders of Life* Ernst Haeckel, 1904

The publication of the present work on *The Wonders of Life* has been occasioned by the success of *The Riddle of the Universe* which was written five years prior to this volume. Within a few months of the issue of this study of the monistic philosophy in the autumn of 1899 ten thousand copies were sold. The clear opposition of the author's monistic philosophy based as it was on the most advanced and sound scientific knowledge to the conventional ideas and to an outworn revelation led to the publication of a vast number of criticisms and attacks. The present work on the wonders of life is as the title indicates a supplementary volume to *The Riddle of the Universe*. While the latter undertook to make a comprehensive survey of the general questions of science as cosmological problems in the light of the monistic philosophy the present volume is confined to the realm of organic science or the science of life. It seeks to deal connectedly with the general problems of biology in strict accord with the monistic and mechanical principles which had been laid down by the author in 1866 in his work titled *General Morphology*. In the latter publication special stress was placed on the universality of the law of substance and the substantial unity of nature which had been further treated in the second and fourteenth chapters of *The Riddle of the Universe*. The arrangement of the vast material for this study of the wonders of life was modeled on that of the *Riddle*. Retained in the present volume is the division into larger and smaller sections and the synopses of the various chapters. Thus the whole biological content falls into four sections and twenty chapters. Preface PsycINFO Database Record c 2010 APA all rights reserved

The Bridge to Nothingness S. Giora Shoham, 1994 In *The Bridge to Nothingness* author Shlomo Giora Shoham explicates myth as a projection of human experience. Human development dynamics according to Shoham are represented by myths and reflected in religious creeds. Myths constitute projective evidence of the development of psychic processes at early orality; they at once reveal and conceal their psychological content. In this work Shoham deals with ideas that are common to Gnosticism, Kabala, and existentialism irrespective of their historical interrelationships. He compares the Heideggerian notion of the thrownness of the individual into the world with the Gnostic teaching of the divine descent and incarnation, the incarceration of the divine in objects and life forms. All three ideologies speak of God as the spiritual core of human being. Union with God is unachievable, but one can achieve symbiosis with God and humanness through creativity and revelation. The author's integration of psychology and mythic symbolism is stimulating. *The Bridge to Nothingness* is filled with deep psychological and spiritual insights. His portrayal of kabalistic thought is perceptive and erudite. He makes use of the latest scholarship and more importantly what he says will contribute to the field and provoke discussion and debate. His sensitivity to the dynamics of mystical experience enables him to see clearly its positive dimension. Very little has been written on the interface between Gnosticism, Kabala, and psychology. Shoham's work is original, provocative, and insightful. The

Bridge to Nothingness will break new ground in these studies and enrich the understanding of psychological and religious symbolism BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Form in Gothic** Wilhelm Worringer, 1927

This is likewise one of the factors by obtaining the soft documents of this **Our Dualistic World Quest For Knowledge** by online.
