Meaning and Necessity - A Study in Semantics and Modal Logic Rudolf Carnap, 2011-03-23 The main purpose of this book is the development of a new method for the semantical analysis of meaning that is a new method for analyzing and describing the meanings of linguistic expressions This method called the method of extension and intension is developed by modifying and extending certain customary concepts especially those of class and property The method will be contrasted with various other semantical methods used in traditional philosophy or by contemporary authors These other methods have one characteristic in common They all regard an expression in a language as a name of a concrete or abstract entity In contradistinction the method here proposed takes an expression not as naming anything but as possessing an intension and an extension Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork

A Reading of Gilles Deleuze's Logic of Sense Mehdi Parsa, 2022-11-07 This is a reading of Gilles Deleuze's masterpiece Logic of Sense It provides a thorough and systematic reading of Deleuze's book by focusing on the aspects that are neglected in the existing literature Specifically the claim that Deleuze's Logic of Sense provides a convincing answer for the most important question of the history of philosophy regarding the relation between thought and existence as well as the relation between logic and ontology is defended The answer is that if thought is related to existence logic is supposed to be not the logic of essence but rather the logic of sense This analysis is pursued respectively through Deleuze's readings of Frege the ancient Stoics Lewis Carroll Kant Lautman Leibniz and Melanie Klein
