**Self-Examination** John M. Budd,2007-11-30 What makes us librarians What is it we do that is indispensable John Budd joins an august group of library science luminaries such as Pierce Butler Jesse Shera and Michael Gorman whose works and example invite professional and critical self examination Here Budd challenges us to confront the uneasy truth of whether libraries still represent people's will and intellect or the cabalistic enclaves of an old guard Through intellectually rich and engaging entrees into ethics democracy social responsibility governance and globalization he makes the case that librarians who fail to grasp the importance of their heritage will never truly respond to societal change or the needs of the individual

user     The Social Construction of a Cultural Spectacle Michael O. Johnston, 2023-08-21 The Social Construction of a Cultural Spectacle Floatzilla concentrates on the tourist element of the Mississippi River with a focus on the media construction of an annual floating event that occurs on the river Michael O Johnston shows that the canoeing and kayaking event itself is void of meaning it is the news media that brings these events to life through real world accounts about a kayaker who nearly collided with a fifty five foot yacht a person dressed up as a pirate with a live parrot as a prop a guy with a Floatzilla logo tattooed on his hand and the death of a longtime friend and cornerstone of the event Johnston draws from research across multiple disciplines to explain how the media constructs the natural and bodily experiences canoers and kayakers say they have while attending Floatzilla He discusses the importance of meaning and sense of place in maintaining a connectedness between the built environment nature and the people who attend this event Ultimately the author contends that social meaning is essential for humans to make sense of their surroundings     Core Processes in Brief Psychodynamic Psychotherapy Denise P. Charman, 2003-10-03 Many students enter graduate programs with little or no experience of psychodynamic psychotherapy Efforts to impart clinical skills have often been less than systematic and beginning psychotherapists have not always been encouraged to think about what they are doing and why they are doing it from a scientific standpoint Thoughtfully building on current debates over efficacy and effectiveness this book outlines a promising approach to training in which the work of therapy is divided into tasks patterned after Luborsky s influential delineation of curative factors significant developments in the course of the therapy that are crucial for effective change Each task step for the therapist cognitive behavioral affective or a combination is analyzed taught separately and then put in sequence with the other task steps Curative factors have been extensively studied in recent years and the approach rests on a solid empirical base In a climate of increased accountability clinicians must demonstrate that they are responding to providers requests to conduct evidence based practices Core Processes in Brief Psychodynamic Psychotherapy will be an invaluable resource not only for students and trainees but for established therapists who find themselves asked to justify their work     **"Code of Massachusetts regulations, 2016"** ,2016 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020     **"Code of Massachusetts regulations, 2004"** ,2004 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020     *General Statutes of Kansas, 1889* Kansas, Irwin M.
