Modernizing Crime Statistics: Report 2 National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on National Statistics, Panel on Modernizing the Nation's Crime Statistics, 2018-05-23 To derive statistics about crime to estimate its levels and trends, assess its costs to and impacts on society, and inform law enforcement approaches to prevent it, a conceptual framework for defining and thinking about crime is virtually a prerequisite. Developing and maintaining such a framework is no easy task because the mechanics of crime are ever evolving and shifting, tied to shifts and development in technology, society, and legislation. Interest in understanding

crime surged in the 1920s which proved to be a pivotal decade for the collection of nationwide crime statistics Now established as a permanent agency the Census Bureau commissioned the drafting of a manual for preparing crime statistics intended for use by the police corrections departments and courts alike The new manual sought to solve a perennial problem by suggesting a standard taxonomy of crime Shortly after the Census Bureau issued its manual the International Association of Chiefs of Police in convention adopted a resolution to create a Committee on Uniform Crime Records to begin the process of describing what a national system of data on crimes known to the police might look like Report 1 performed a comprehensive reassessment of what is meant by crime in U S crime statistics and recommends a new classification of crime to organize measurement efforts This second report examines methodological and implementation issues and presents a conceptual blueprint for modernizing crime statistics

Measuring Crime Doris L. MacKenzie, Phyllis Jo Baunach, Roy R. Roberg, 1990 The authors systematically explore and integrate available knowledge about the essential large data bases in criminological research The book critically examines the way crime is measured and the future of statistical methods in the National Crime Survey and the Uniform Crime Reports FBI A distinguished group of contributors discusses theoretical issues of crime measurement analyzes the National Crime Survey NCS examines surveys and censuses for prisons and jails and their limitations explores the use of archival data in criminological research and measuring homicide and discusses implications for policy in the criminal justice arena

The Mismeasure of Crime Clayton J. Mosher, Terance D. Miethe, Timothy C. Hart, 2010-12-01 This book addresses the measurement of crime both historically and cross nationally It examines the strengths and weaknesses of each data source the fundamental issues surrounding their accuracy and the applications of these data in theoretical and policy research

How Crime in the United States is Measured

Nathan James, Logan Rishard, 2008 Crime data collected through the Uniform Crime Reports UCR the National Incident Based Reporting System NIBRS and the National Crime Victimization Survey NCVS are used by Congress to inform policy decisions and allocate federal criminal justice funding to states As such it is important to understand how each program collects and reports crime data and the limitations associated with the data This book reviews 1 the history of the UCR the NIBRS and the NCVS 2 the methods each program uses to collect crime data and 3 the limitations of the data collected by each program The book then compares the similarities and differences of UCR and NCVS data It concludes by reviewing issues related to the NIBRS and the NCVS The UCR represents the first effort to create a national standardised measure of the incidence of crime It was conceived as a way to measure the effectiveness of local law enforcement and to provide law enforcement with data that could be used to help fight crime UCR data are now used extensively by researchers government officials and the media for research policy and planning purposes The UCR also provides some of the most commonly cited crime statistics in the United States The UCR reports offence and arrest data for 8 different Part I offences and arrest data for 21 different Part II offences The NIBRS was developed by the Federal Bureau of Investigation to respond to the law enforcement community's belief that the UCR needed to be updated to provide more in depth data to meet the needs of law enforcement into the 21st century The NIBRS collects data including data on offence s offender s victim s arrestee s and any property involved in an offence for 46 different Group A offences and 11 different Group B offences Despite the more detailed crime data that the NIBRS can provide nation wide implementation of the program has been slow for a variety of reasons including cost considerations The NCVS is the primary source of information on the characteristics of criminal victimisation and on the number and types of crime not reported to law enforcement The NCVS has four major objectives 1 to develop detailed information about the victims and consequences of crime 2 to estimate the number and types of crimes not reported to police 3 to provide uniform measures of selected types of crimes and 4 to permit comparisons over time and population type e g

urban suburban and rural The NCVS asks respondents whether they have been the victim of rape and sexual assault robbery simple and aggravated assault purse snatching pick pocketing burglary theft or motor vehicle theft In addition to collecting data on the number of victimisations the NCVS gathers data on the details of each incident of victimisation **Measuring Crime** Patsy A. Klaus,1981 *Drugs and Crime in Public Housing* Terence Dunworth,1994 The Annals of the American Academy of Political and Social Science ,1897 Measuring Crime and Delinquency Over the Life Course Alex R. Piquero,Terence P. Thornberry,Marvin D. Krohn,Alan J. Lizotte,Nicole Leeper Piquero,2014-03-28 Measuring Crime and Delinquency Over the Life Course presents one of the most detailed analyses of the longitudinal pattern of crime and delinquency using data from one of the most famous longitudinal studies ever conducted in the field the Rochester Youth Development Study as well as complimentary data on offending from both official and self report records Never before has such information been presented with a specific focus on changes in offending patterns between adolescence and adulthood among individuals differentiated by race and gender This project will undertake a replication of the classic Hindelang Hirschi and Weis 1981 book Measuring Delinquency Aside from replicating key chapters the proposed project will move beyond this previous work in three important ways 1 it will present a comparison of both self report and official records of offending among the same persons 2 it will extend the previous analyses by also conducting race ethnic comparisons specifically by including Hispanics as well as conducting gender comparisons and 3 it will examine whether self report estimates of offending at a previous time period relate to official records of offending at a later time period The authors of this book are among the leading life course criminologists in the world and their collective theoretical methodological statistical and policy expertise will make this book one of the key readings in criminology generally and life course criminology in particular
