Measuring International Trade on U.S. Highways National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Bureau of Transportation Statistics International Trade Traffic, 2005-01-16 International trade plays a substantial role in the economy of the United States. More than 1.6 billion tons of international merchandise was conveyed using the U.S. transportation system in 2001. The need to transport this merchandise raises concerns about the quality of the transportation system and its ability to support this component of freight movement. Measuring International Trade on U.S. Highways evaluates the accuracy and reliability of measuring the ton miles and value miles of international trade traffic carried by highway for each state. This report also assesses the accuracy and reliability of the use of diesel fuel data as a measure of international trade traffic by state and identifies needed improvements in long term data collection programs.

Brooks, 2008 Heightened awareness of North America's vulnerability to terrorism in the aftermath of 9/11 has precipitated a crisis for transport suppliers and cargo owners one that jeopardizes economic prosperity. Mary Brooks examines one industry sector of the North American economic relationship transportation services from the perspectives of transport supplier, cargo owner and policymaker. Ensuring security in international transportation without compromising operational effectiveness is a delicate balancing act. There is concern that economic benefits from NAFTA and the Canada US Trade Agreement may have been diminished by the current security focus of American officials. The author addresses these concerns beginning with a history of NAFTA and subsequent continental economic integration. Succeeding chapters provide an economic and regulatory assessment of the North American transport network and examine key issues for both cargo interests and surface transport suppliers. The issues of perimeter security and growing regionalization are also explored. The author closes with a discussion of North America's transportation future under the Security and Prosperity Partnership. The unique insights of North American Freight Transportation will be of interest to policymakers those in the transport sector as well as researchers and
