Measuring The Costs Of Visible Protection In Korea:

Measuring the Costs of Visible Protection in Korea Nam-du Kim, 1996 The latest in a series of efforts to estimate the price that nations pay for their protective trade barriers the book lays out some of the key import policies of this newly industrialized Asian power As Korean participation in the international economy expands and membership in the OECD takes place Korea will need to resolve several commercial tensions with its trading partners This study describes key parts of the Korean import system estimates the cost of its visible barriers and recommends policy reforms *International Economic Review* ,2003 **USITC Publication** ,1998 *Free Trade Between Korea and the United States?* In-bŏm Ch'oe, Jeffrey J. Schott, 2001 This study examines the economic and political benefits of the U S pursuing Free Trade Agreement negotiations with Korea which is pursuing FTA accords as part of a strategy to restructure its economy and sustain the recovery from its 1997 98 economic crisis The authors examine the impact of a prospective pact on other trading partners on the Asia Pacific Economic Cooperation and on the multilateral trading system **The Economic Implications of Liberalizing APEC Tariff and Nontariff Barriers to Trade** ,1998 **Global Economic Issues and Policies** Joseph P. Daniels, David D. VanHoose, 2014-04-24 This introduction to all aspects of international economics public policy business and finance is the clearest guide available to the economics of the world we live in Written in a highly engaging style packed full of up to the minute real world case studies and pitched at an introductory level the book does an expert job of drawing students in and will leave them equipped with a comprehensive toolkit of methods and essential facts Covering the wide range of economic issues and policies generated by globalization the text provides an introduction to the topic that emphasizes facts as well as theories presenting all new economic concepts clearly and in detail This third edition reflects continuing developments in the world economy and in the analysis of international economics Chapter introductions pedagogy and data have all been thoroughly updated throughout and key topics for expansion and revision include Free Trade versus Fair Trade Bilateral and Multilateral Treaties International Outsourcing Public Perceptions of International Trade The Trilemma Issue Business Cycle Synchronization Central Bank Emergency Tools Sovereign Debt Problems This text is suitable for any introductory module in international economics public policy and business whether taught as part of an economics public policy business or international studies program It is also the ideal MBA level introduction to the global economy Cardozo Journal of International and Comparative Law ,2002 **Managing The Euro Area Debt Crisis** William R Cline, 2016-04-01 First came the financial and debt crisis in Greece then government financing difficulties and rescue programs in Ireland in 2010 and Portugal in 2011 Before long Italy and Spain were engulfed by financial contagion as well Finally in 2012 the European Central Bank pledged to do whatever it takes to preserve the euro area with purchases of government bonds a step that achieved impressive results according to William R Cline in this important new book One of the world's leading experts on fiscal and debt issues Cline mobilizes meticulously researched and forceful arguments to trace the history of the euro area

debt crisis and makes projections of future debt sustainability He argues that euro area leaders made the right decision to keep the euro from breaking apart but warns against complacency about the future Cline contends that troubled European economies should continue their fiscal consolidation but that further debt restructurings for most countries are not called for Greece is a special case and may need some further debt relief contingent on continued progress on fiscal and structural reform however In this landmark study Cline offers a detailed analysis of the mistakes successes and options for Europe as it struggles to overcome its worst economic disaster since World War II

Roots of Competitiveness Daniel H. Rosen, Scott Rozelle, Jikun Huang, 2004 *Roots of Competitiveness* China's Evolving Agriculture Interests examines China's interests in global agriculture trade liberalization It begins with an overview of China's policy behavior in recent WTO talks and then goes back to describe the reform foundations that got China to this point This study seeks to clarify for uncertain observers China's underlying interests on the question of agriculture trade liberalization whether to go faster slower not at all beyond the status quo or even backwards

US National Security and Foreign Direct Investment Edward Montgomery Graham, David Matthew Marchick, 2006 Examines foreign direct investment FDI in the United States the national security concerns associated with this investment and treatment of these concerns under US policy This book asks whether the Committee on Foreign Investments in the United States CFIUS process can be improved and answers in the affirmative Does foreign ownership of American businesses pose a threat to the United States like the abortive attempt by CNOOC a Chinese company to purchase Unocal during the summer of 2005 This important new book examines foreign direct investment FDI in the United States the national security concerns associated with this investment and treatment of these concerns under US policy It asks whether the Committee on Foreign Investments in the United States CFIUS process can be improved and answers in the affirmative The book starts by looking at the review process for foreign takeovers of US firms including a historical review looks at the economic and political impact on the United States of foreign direct investment takes a detailed look at issues relating to FDI posed by the rise of China as an economic and geopolitical power and finally suggests some changes to the Exon Florio process

Economic Integration of the Korean Peninsula Marcus Noland, 1998 The North Korean economy cannot sustain its population Absent fundamental economic reforms it will never be able to do so Hence North Korea will require sizable external support for the foreseeable future South Korea China Japan and the United States have been willing to provide this support because they fear a collapse in the North or even worse a lashing out that would unleash war on the peninsula and put millions of people in Asia in jeopardy including thousands of US troops stationed in South Korea and Japan The status quo is thus closer to extortion than charity In this volume a diverse group of contributors analyze prospective developments on the Korean peninsula The authors first address the three broad strategic possibilities of war collapse and gradual adjustment Four immediate policy issues are then considered the current economic conditions and policies in the North the food crisis the nuclear energy nuclear weapons issue and the possibility of large scale refugee flows

Finally the volume considers several longer run issues concerning the inevitable integration of the peninsula the potential relevance of the German experience the costs and benefits of economic unification between North and South Korea and the possible role of the international financial institutions in funding the new arrangement The volume concludes with recommendations for policymakers especially in the United States and South Korea from the preceding analyses

Controlling Currency Mismatches in Emerging Markets Morris Goldstein, Philip Turner, 2004 In most of the currency crises of the 1990s the largest output falls have occurred in those emerging economies with large currency mismatches a phenomenon that occurs when assets and liabilities are denominated in different currencies such that net worth is sensitive to changes in the exchange rate Currency mismatching makes crisis management much more difficult since it constrains the willingness of the monetary authority to reduce interest rates in a recession for fear of initiating a large fall in the currency that would bring with it large scale insolvencies The mismatching also produces a fear of floating on the part of emerging economies sometimes inducing them to make currency regime choices that are not in their own long term interest Morris Goldstein and Philip Turner summarize what is known about the origins of currency mismatching in emerging economies discuss how best to define and measure currency mismatching and review policy options for reducing the size of the problem **Journal of Economic Literature** ,2004 Curbing the Boom-bust Cycle John Williamson, 2005 Annotation Recent years have not only witnessed a big expansion in the size of capital flows to emerging markets but also a great deal of volatility in those flows This boom bust pattern has been a disadvantage to both lenders and borrowers The attempts to redesign the international financial architecture have already paid a great deal of attention to reforms that the borrowers need to make in order to curb the boom bust cycle but far less attention has been paid to reforms that could and should be made by the lenders This study seeks to redress the balance It examines the different forms of capital flows and then suggests reforms that could be made both by the lenders themselves and by the authorities that regulate them to reduce the volatility in the flow of capital

Avoiding the Apocalypse Marcus Noland, 2000 Korea is experiencing three crises a famine in the North a confrontation over the North's nuclear weapons programme and now an economic crisis in the South This volume examines the implications of these crises for Korea the United States and others with interests in the peninsula

Free Trade Agreements Jeffrey J. Schott, 2004 Economists and trade policymakers address the US initiatives to enter into free trade negotiations with a broad range of countries in the Asia Pacific region the Western Hemisphere and Africa The sheer number of these initiatives is unprecedented and has provoked major policy questions concerning US interests in the negotiations the setting of priorities among the many contenders for concluding free trade agreements FTAs with the United States the objectives of those trading partners and the implications that these agreements could have for broader initiatives such as the Doha Round of global trade talks and the Free Trade Area of the Americas The papers in the volume present the conceptual case for FTAs and how they have worked in the past examine what FTAs imply for the broader global system and

discuss specific agreements that are already being pursued Australia Central America Morocco and the Southern African Customs Union or considered ASEAN Brazil Egypt Korea and Taiwan The volume includes a technical appendix with results of simulations of the trade and welfare effects of prospective agreements Back cover *Dollar Adjustment* C. Fred Bergsten, Institute for International Economics (U.S.), 2004 The dollar rose about 35 percent in real terms from 1995 to the end of 2001 supporting the US economy of the late 1990s but pushing the current account deficit to a record high This book looks at the impact of this examining intervention to achieve desired currency values and the impact of a major dollar realignment on worldwide economies **Trade Policy and Global Poverty** William R. Cline, 2004 Annotation This study examines the impact of industrial country protection on poverty in developing countries *Toward a North American Community* Robert A. Pastor, 2001 The Mexican peso crisis struck in late December 1994 coinciding with a new Mexican administration and the end of the first year of the North American Free Trade Agreement NAFTA The crisis poignantly highlighted the success and the inadequacy of the treaty success in the expansion of trade and capital flows and inadequacy in institutional capacity The Canadian Mexican and US governments defined the agreement so narrowly that they failed to devise a mechanism that could monitor anticipate plan or even respond to such a serious problem The president of Mexico Vicente Fox has boldly proposed transforming the free trade area into a common market like Europe's In this visionary study Robert A Pastor seizes Fox's idea and maps out the paths toward making it a reality He analyzes NAFTA's successes and shortcomings extracts lessons from the European Union's 40 years of reducing disparities between rich and poor countries and proposes ways that NAFTA can adapt and incorporate those lessons The centerpiece of the book is a detailed proposal for new institutions and North American plans for infrastructure and transportation immigration and customs and projects aimed at lifting the poorer regions This book is the first to propose a detailed approach to a North American Community different from the European Common Market but drawing lessons from its experience It will be of considerable interest to policymakers as well as researchers and students of international political economy world trade and foreign affairs **The Accelerating Decline in America's High-skilled Workforce** Jacob F. Kirkegaard, 2007 As a result in the coming decade America could face broad and substantial skill shortages and will increasingly need foreign high skilled workers Meanwhile as America debates the merits of immigration reform other rich nations have rapidly revamped their high skilled immigration systems making the United States one of many destinations for high skilled immigrants For America to regain its leadership in global talent it must urgently reform its high skilled immigration programs particularly the H 1B work visa and legal permanent resident green card programs US policymakers should in the face of accelerating global economic integration make high skilled immigration an essential component of their broader foreign economic policies The aim must be to ensure a continuous inflow of required high skilled workers to the United States in a manner that enjoys broad domestic political support BOOK JACKET
