Mechanisms Of Ionic Polymerization:

Mechanisms of Ionic Polymerization B.L. Erusalimskii, 2012-12-06 In the last twenty years the literature on the processes of ionic polymerization has reached such a level that there is not a single question which is not covered by the information contained in the many monographs reference books and textbooks in this field It is easy for the interested reader to find sources for in depth study for a superficial acquaintance with the fundamentals of the subject or with the general features of these processes At the same time the field is being continually enriched by new facts which have not only broadened the data base but which influence existing concepts on the mechanisms of these reactions Such influences often touch the very foundations of these concepts i e they go beyond simple descriptions of the structure of the pre reaction states or earlier schemes It is therefore appropriate to attempt a critical appraisal of the modern views on the mechanisms of formation of macro molecules in ionic systems which envisages so far as is possible the differentiating of fundamental and hypothetical conclusions or concepts With this in mind we have preferred to address ourselves to the reader who is already quite well acquainted with the general literature This has allowed us to dispense with detailed introductions to the questions discussed and to limit ourselves to brief comments on the fundamentals of the subject

Cationic Polymerizations Krzysztof Matyjaszewski, 1996-04-26 This unified presentation of cationic polymerization discusses initiation propagation transfer and termination in cationic polymerizations of alkenes and heterocycles It also elucidates the mechanisms of the reactions involved in all carbocationic and ring opening polymerizations It is written by internationally acclaimed experts in their respective fields

Ionic Polymerization and Living Polymers M. Szwarc, M. van Beylen, 2012-12-06 More than simply an up to date review of ionic polymerization this book presents an in depth and critical comparison of the anionic and cationic polymerization of vinyl monomers and heterocyclic compounds These different modes of ionic polymerization are examined with regard to their capacity for producing living polymers The concept of living polymers is re examined and redefined in light of current knowledge of ionic polymerization and possible side reactions Throughout the authors offer perceptive insights into the basic concepts of polymerization chemistry and polymerization reaction mechanisms The book begins with a review of ionic and radical polymerizations the development of ionic polymerization living and dormant polymers and polymerizability It goes on to consider important aspects of the structure and properties of ionic species initiation and propagation of ionic polymerization polymerization steps other than initiation or propagation such as termination isomerization transfer backbiting and degradation and ionic copolymerization *Ionic Polymerization and Living Polymers* is a much needed advanced text that will be widely read and referred to by polymer scientists macromolecular chemists and materials scientists

Principles and Practice describes the unique nature of the anionic mechanism of polymerization This book is composed of two parts encompassing 11 chapters that cover the aspects of the synthetic possibilities inherent in this system Part I deals with the various aspects of anionic polymerization mechanism including the monomers initiators solvents and the involved initiation and propagation reactions This part also describes the copolymerization and organolithium polymerization reactions of styrene and dienes Part II explores the applications of anionic polymerization in polymer synthesis This part specifically tackles the synthesis of narrow molecular weight branched and difunctional polymers and block copolymers Polymer chemists and researchers who work in the chemical industry and who would wish to utilize the unique features of anionic polymerization in the synthesis of new products will find this book invaluable *IONIC POLYMERIZATION. Plesch,2016-01-11 The Chemistry of Cationic Polymerization covers the fundamental aspects of organic chemistry that provide significant insights into the many facets of cationic polymerization processes and products Each chapter deals with individual and groups of monomers Considerable chapters examine the chemistry of oxygen compounds Other chapters describe the techniques for cationic polymer analysis and detection This text also considers sulfur compounds particularly their polymerizations by radical and anionic mechanisms The remaining chapters explore the polymerization and products of carbonium ions related organic reactions and comparison with radical and anionic polymerizations as well as the conspectus of kinetics and mechanism This book is of great value to organic and polymer chemists Polymer Science U.S.S.R. ,1991

Mechanism and Kinetics of Addition Polymerizations M. Kucera,1991-11-26 This volume presents an up to date survey of knowledge concerning addition type polymerizations It contains nine chapters each of which covers a particular basic term Whenever necessary the phenomena are discussed from the viewpoint of both stationary and non stationary state of radical ionic i e anionic and cationic and coordination polymerization Special attention has been paid to the propagation

process It provides not only a general overview but also information on important special cases theoretical conditions of propagation influence of external factors controlled propagation copolymerization mechanism of various propagation types etc The book is arranged according to the basic steps in chain reactions which is a novel approach in a monograph on this topic It facilitates the identification of common features of various polymerization types which may appear quite different This useful comprehensive text should prove invaluable to all those involved in the field of macromolecular chemistry It will also be of interest to all chemists who beside the profound study of their own field are looking for interdisciplinary liaison points
