## **Media Firms Structures Operations And Performance:**

**Media Firms** Robert G. Picard, 2002 Media Firms presents studies applying the company level approach to media and communication firms. It explores differences among missions, strategies, organizational choices and other business decisions. Reviewing economic factors and pressures on media and communications companies, this book seeks to improve understanding of how these elements affect market and company structures, operations and performance of firms. The chapters written by leading scholars worldwide were selected from papers on the theme of media firms presented at the 5th World Media Economics Conference hosted by the Turku School of Economics and Business Administration and The Journal of Media Economics. The collected studies provide an overview of economic and related managerial issues affecting the structures of markets in which firms compete, the operations of media and communications firms and their financial performance. As a result, it expands the discussion of economic issues traditionally associated with the field due to a narrowed focus of initial books in media economics. It is hoped that this book will induce additional avenues of inquiry regarding such issues.

**Media Product Portfolios** Robert G. Picard, 2014-04-08 Media product portfolios are rapidly becoming the predominant shared characteristic of media companies worldwide. The phenomenon involves firms from all kinds of media: newspapers, magazines, television, radio, cinema, and is found in enterprises ranging from small local firms to large, globalized companies. This volume is the result of a coordinated effort of scholars in the United States and Europe to explore the characteristics, processes, challenges and implications of media product portfolios. This book breaks new ground by introducing the concepts of product portfolio management and applying them to media companies in a comprehensive manner. It draws from knowledge and methods of analyzing product portfolio management in other industries, applies that knowledge to media industries and analyzes current practices in media firms. The process and issues of portfolio strategy development and management are complex and wide ranging. The book explores the development of media product portfolios from an interdisciplinary perspective, providing insight from business, economic, organizational and communication approaches. The book explores why and how firms develop portfolios, how company strategy and organizational development relate to portfolios, the role of leaders in developing portfolio activities, economic and economic geography issues in portfolios, production issues, challenges in managing multiple products and operations, issues of marketing and branding, issues in portfolios, personnel implications and the unique challenges in the internationalization of media portfolio operations.

**21st Century Communication: A Reference Handbook** William F. Eadie, 2009-05-15 The discipline of communication has grown in popularity from the time professors of journalism and speech decided in the mid 1960s that the term communication was an excellent general descriptor for the theory and research that each group aspired to create. Over time, the two groups grew closer and recognized significant overlap in their theoretical and research interests, but there were also differences in their traditions that kept them apart. While both groups agreed that communication is a practical discipline,

journalism professors focused a great deal of their attention on the education of media professionals Speech professors on the other hand often were more oriented to the liberal arts and valued the fact that communication could be approached from a variety of traditions including the arts humanities social sciences and even the sciences A key term in 21st Century communication however is convergence Not only are media and technology converging with each other to produce new means of communicating but individuals are increasingly using both new and existing communication tools to create new forms of communication This convergence forces the various camps within the communication discipline to draw upon each other's theories and research methods to keep up with explaining the rapidly changing communication environment This convergence of ideas and theories provides a space to challenge conventional ways of thinking about the communication discipline and that's the goal of the SAGE 21st Century Reference Series volumes on Communication General Editor William F Eadie has sought to honor the diversity of the study of communication but also integrate that diversity into a coherent form dividing communication study into four basic properties 1 processes 2 forms and types of communication 3 characteristics to consider in creating messages and 4 relationships between communicators Via 100 chapters this 2 volume set available in both print and electronic formats highlights the most important topics issues questions and debates any student obtaining a degree in the field of communication ought to have mastered for effectiveness in the 21st Century The purpose is to provide undergraduate majors with an authoritative reference source that will serve their research needs going forward in this exciting field with more detailed information than encyclopedia entries but not as much jargon detail or density as a journal article or a research handbook chapter Comprehensive coverage captures all the major themes and subfields within communication For instance Volume 1 themes include the discipline of communication approaches to the study of communication key processes of communication forms and types of communication key characteristics of messages key communication relationships factors affecting communication and challenges and opportunities for communication Themes in Volume 2 are media as communication communication as a profession journalism public relations advertising and media management Authoritative content is provided by a stellar casts of authors who bring diverse approaches diverse styles and different points of view Curricular driven emphasis provides students with initial footholds on topics of interest in researching for term papers in preparing for GREs in consulting to determine directions to take in pursuing a senior thesis graduate degree career etc Uniform chapter structures make it easy for students to locate key information with a more or less common chapter format of Introduction Theory Methods Applications Comparisons Future Directions Summary Bibliography Suggestions for Further Reading and Cross References Availability in print and electronic formats provides students with convenient easy access **Current and Emerging Issues in the Audiovisual Industry** Mercedes Medina, Mónica Herrero, Alicia Urgellés, 2017-02-07 This book focuses on the challenges of competition in television broadcasting markets How is the evolution from a two sided market to platform economics reshaping competition in

television broadcasting How are new market dynamics changing competition for content creation and acquisition and the revenue streams Will content remain king Or will new competitive dynamics undermine the sustainable creation of high quality content especially in small media markets     **Communications Media, Globalization, and Empire** Oliver Boyd-Barrett,2007-02-20 An exploration of the political economy of media and to what extent global communications and popular entertainment continue to serve elite interests In Communications Media Globalization and Empire an international team of experts analyzes and critiques the political economy of media communications worldwide Their analysis takes particular account of the sometimes conflicting pressures of globalization and neo imperialism The first is commonly defined as the dismantling of barriers to trade and cultural exchange and responds significantly to lobbying of the world's largest corporations including media corporations The second concerns US pursuit of national security interests as response to terrorism at one level and at others to intensifying competition among both nations and corporations for global natural resources

**21st Century Economics: A Reference Handbook** Rhona C. Free,2010-05-14 Interest in economics is at an all time high Among the challenges facing the nation is an economy with rapidly rising unemployment failures of major businesses and industries and continued dependence on oil with its wildly fluctuating price Americans are debating the proper role of the government in company bailouts the effectiveness of tax cuts versus increased government spending to stimulate the economy and potential effects of deflation Economists have dealt with such questions for generations but they have taken on new meaning and significance Tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed 21st Century Economics A Reference Handbook is intended to meet the needs of several types of readers Undergraduate students preparing for exams will find summaries of theory and models in key areas of micro and macroeconomics Readers interested in learning about economic analysis of an issue as well students embarking on research projects will find introductions to relevant theory and empirical evidence And economists seeking to learn about extensions of analysis into new areas or about new approaches will benefit from chapters that introduce cutting edge topics To make the book accessible to undergraduate students models have been presented only in graphical format minimal calculus and empirical evidence has been summarized in ways that do not require much background in statistics or econometrics It is thereby hoped that chapters will provide both crucial information and inspiration in a non threatening highly readable format     **21st Century Communication** William F.
