Advanced Musical Performance: Investigations in Higher Education Learning Ioulia Papageorgi, Graham Welch, 2016-03-23 To reach the highest standards of instrumental performance several years of sustained and focused learning are required. This requires perseverance, commitment and opportunities to learn and practise often in a collective musical environment. This book brings together a wide range of enlightening current psychological and educational research to offer deeper insights into the mosaic of factors and related experiences that combine to nurture and sometimes hinder advanced musical performance. Each of the book's four sections focus on one aspect of music performance and learning: musics in higher education and beyond, musical journeys and educational reflections, performance learning and developing expertise and professionalism. Although each chapter within its home section offers a particular focus, there is an underlying conception across all the book's contents of the achievability of advanced musical performance and of the important nurturing role that higher education can play, particularly if policy and practice are evidence based and draw on the latest international research findings. The narrative offers an insight into the world of advanced musicians, detailing their learning journeys and the processes involved in their quest for the development of expertise and professionalism. It is the first book of its kind to consider performance learning in higher education across a variety of musical genres, including classical, jazz, popular and folk musics. The editors have invited an international community of leading scholars and performance practitioners to contribute to this publication, which draws on meticulous research and critical practice. This collection is an essential resource for all musicians, educators, researchers and policy makers who share our interest in promoting the development of advanced performance skills and professionalism.

**Music Learning as Youth Development** Brian Kaufman, Lawrence Scripp, 2019-05-30 *Music Learning as Youth Development* explores how music education programs can contribute to young people's social, emotional, cognitive and artistic capacities in the context of life long musical development. International scholars argue that MLYD programs should focus in particular on the curiosity, energy and views of young people, affecting the teachers, musicians, pedagogy, programs and music with which young people interact. From fields of progressive music education, authors share their perspectives on approaches that can lead to new ways of enabling youth learners as they transition to adulthood. A vast range of possible outcomes arising from in school, afterschool and community based music programs are examined in order to highlight the aspects of youth development that music learning is particularly well suited to support. Following an introductory essay that provides new perspectives on pursuing lifelong musical development, the volume features two primary sections. The first focuses on case studies exploring several programs through the lens of the transitional stages of music learning as youth development, helping the reader understand key concepts and explore challenges for creating music learning as youth development programs. The second section addresses the broad implications and policy issues of programs described, including discussing why music learning should be

conceived of as critical to formative stages of youth development that can lead to a productive and fulfilling life The conclusion synthesizes the range of perspectives provided by eight contributors and offers implications for life long human development through music in the 21st century **Music Theory Illustrated on Piano** Paul Noddings,2015-10-12 Music
